

# Chorley NI-153 FACTSHEET

## NI-153, Working-age people claiming out of work benefits in the worst performing neighbourhoods

NI-153 is the chosen Employability / Worklessness indicator in the Lancashire LAA, supported by a local indicator (NI-152) concentrating on working-age people claiming out of work benefits across the county.

The calculations and formulas for NI-153 are taken from guidance issued by DCLG.

*Worst performing neighbourhoods* are defined as lowest-super output areas (LSOAs) where the average % of people claiming an out-of work benefit for the four quarters May 2006, August 2006, November 2006 and February 2007 as against the working-age population for those areas exceeded 25%. Using this calculation there are 83 LSOAs in Lancashire, with at least two LSOAs in all districts with the exceptions of Fylde and Ribble Valley.

An *out-of-work benefit* is defined as unemployed people claiming Job Seekers Allowance, Lone Parents on income support, Incapacity Benefits, and others on income-related benefits).

The baseline data for the LAA recognised the four-quarter average of out-of-work benefit claimants for the four quarters August 2006, November 2006, February 2007 and May 2007.

Recently data for August and November 2007 and February 2008 has been released and this is included in the data for each district in this paper.

The target in the LAA is calculated as follows:

<u>Working-Age population</u>	<u>Claimants in LSOAs</u>	<u>% (LAA baseline)</u>
74,925	22,550	30.1

Most recent data is for February 2008 is:

<u>Working-Age population</u>	<u>Claimants in LSOAs</u>	<u>% (if only used Feb.'08)</u>
74,925	21,495	28.7 (-1.4%)

# Chorley NI-153 FACTSHEET

## Chorley (NI153)

*NI153 pre-fix indicates the data is for districts made up from the 83 SOAs. Otherwise data is for the entire district.*

- NI153: Marginally larger proportion of population at working age than Lancashire wide – 62% versus 61.2%.
- NI153: 47.3% of households are categorised as “Municipal Dependency” by MOSAIC data – families with low incomes and low aspirations who live in large council estates.
- NI153: Large real estate, renting and business activities sector accounting for 37.3% of all jobs compared to 12.8% Lancashire wide.
- High obesity levels – more than a quarter of Chorley’s over 16 population is obese.
- High levels of binge drinking – levels exceed regional rates of 23%.
- NI153: Hospital episodes resulting from alcohol and drug use are ranked as above average or high in 89.2% of the area according to MOSAIC data.
- NI153: Lower levels of crime and anti-social behaviour than other NI153 districts, although levels remain above those for Lancashire. One out of four SOAs fall within the bottom 10% for crime deprivation nationally.
- NI153: Low levels of access to green space – less than 0.1 thousand m<sup>2</sup> per 1,000 population compared to 2.3 thousand m<sup>2</sup> nationally (10.6 thousand m<sup>2</sup> Lancashire wide).
- NI153: Poor air quality – combined air quality score of 1.2 compared to the 1.01 average for Lancashire.

# Chorley NI-153 FACTSHEET

## Targets

Partners through the LAA have agreed:

- 2% reduction in all areas;
- 2.5% reduction in areas with Working Neighbourhoods Fund (WNF)

<u>LAA baseline</u>	<u>Target (2011)</u>	<u>Less claimants *</u>
30.1%	28.1%	1499

<u>District</u>	<u>LAA baseline (%)</u>	<u>% reduction</u>	<u>Target</u>	<u>Less claimants *</u>
Burnley	31.8	2.5	29.3	322
<b>Chorley</b>	<b>25.7</b>	<b>2</b>	<b>23.7</b>	<b>69</b>
Hyndburn	29.9	2.5	27.4	203
Lancaster	30.0	2	28.0	165
Pendle	28.4	2.5	25.9	229
Preston	31.4	2.5	28.9	340
Rossendale	27.4	2	25.4	50
South Ribble	28.0	2	26.0	28
West Lancs.	30.3	2	28.3	211
Wyre	30.2	2	28.3	101
				1718

\* - this is an equivalent to figure for the number of people who would have to stop claiming benefits with no other people registering for claiming a benefit and a static working-age population.

### Group A: Symbols of Success

People whose lives are 'successful' by whatever yardsticks society commonly uses to measure success. These are people who have rewarding careers rather than jobs, who live in sought after locations, who drive the more modern and expensive cars and who indulge in the most exotic leisure pursuits. Most, though not all, appear to enjoy stable household arrangements.

### Group B: Happy Families

Happy Families contains people whose focus is on career, home and family. These are mostly younger age groups who are married, or at least in a permanent relationship, and are now raising children in post war family houses, often in areas of the country with rapidly growing populations. The focus of expenditure is on equipment for the home and garden, and the immediate family unit is the principal focus of leisure activities.

### Group C: Suburban Comfort

Suburban Comfort comprises people who have successfully established themselves and their families in comfortable homes in mature suburbs. Children are becoming more independent, work is becoming less of a challenge and interest payments on homes and other loans are becoming less burdensome. With more time and money on their hands, people can relax and focus on activities that they find intrinsically rewarding.

### Group D: Ties of Community

Ties of Community is comprised of people whose lives are mostly played out within the confines of close knit communities. Living mostly in older houses in inner city neighbourhoods or in small industrial towns, most of these people own their homes, drive their own cars and hold down responsible jobs. Community norms rather than individual material ambitions shape the pattern of most residents' consumption.

### Group E: Urban Intelligence

Urban Intelligence mostly contains young and well educated people who are open to new ideas and influences. Young and single, and few encumbered with children, these people tend to be avid explorers of new ideas and fashions, cosmopolitan in their tastes and liberal in their social attitudes. Whilst eager consumers of the media and with a sophisticated understanding of brand values, they like to be treated as individuals, and value authenticity over veneer.

### Group F: Welfare Borderline

Welfare Borderline is comprised of many people who are struggling to achieve the material and personal rewards that are assumed to be open to all in an affluent society. Few hold down rewarding or well paying jobs and, as a result, most rely on the council for their accommodation, on public transport to get around and on state benefits to fund even the bare

# Chorley NI-153 FACTSHEET

essentials. The lack of stability in many family formations undermines social networks and leads to high levels of anti social behaviour among local children.

## **Group G: Municipal Dependency**

Municipal Dependency mostly contains families on lower incomes who live on large municipal council estates where few of the tenants have exercised their right to buy. Often isolated in the outer suburbs of large provincial cities, Municipal Dependency is characterised as much by low aspirations as by low incomes. Here people watch a lot of television and buy trusted mainstream brands from shops that focus on price rather than range or service.

## **Group H: Blue Collar Enterprise**

Blue Collar Enterprise comprises people who, though not necessarily very well educated, are practical and enterprising in their orientation. Many of these people live in what were once council estates but where tenants have exercised their right to buy. They own their cars, provide a reliable source of labour to local employers and are streetwise consumers. Tastes are mass market rather than individualistic and focus on providing comfort and value to family members.

## **Group I: Twilight Subsistence**

Twilight Subsistence consists of elderly people who are mostly reliant on state benefits, and live in housing designed by local authorities and housing associations. Some live in old people's homes or sheltered accommodation, while others live in small bungalows, set in small enclaves within larger council estates. Most of these people spend money only on the basic necessities of life.

## **Group J: Grey Perspectives**

Grey Perspectives consists mostly of pensioners who own their homes and who have some source of income beyond the basic state pension. Many of these people have, on retirement, moved to the seaside or the countryside to live among people similar to themselves. Today many of these people have quite active lifestyles and are considered in their purchasing decisions.

## **Group K: Rural Isolation**

Rural Isolation contains people whose pattern of living is distinctively rural. They live not just outside major population centres but also deep in the countryside, in small communities which have been little influenced by the influx of urban commuters. These are places where people with different levels of income share attachments to local communities, and where engagement with the community and with the natural environment are more important to most residents than material consumption.
