Lancashire County Council Children & Young People's Public Health — Child Health Profiles 2017

Public Health, assisted by Business Intelligence within Lancashire County Council have created 34 middle level (MSOA* cluster) Child Health Profiles (CHPs). This is because the CHPs on the Public Health England website are only at upper tier level. This does not show the outcome data at sub-district level but just an overview of children and young people's health across the whole of County. These lower level profiles highlight where children's health needs are the greatest and opportunities to reduce inequalities are greatest.

ROSSENDALE WEST

There is just 1 GP practice in Rossendale West.

There are 12 primary schools, 2 secondary schools (both with 6th forms) and 1 independent school.

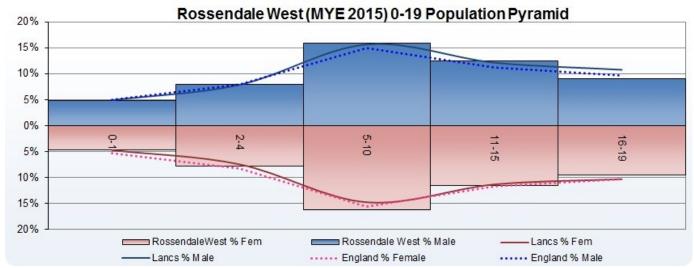

Child health outcomes are quite good in this area with Rossendale West having the lowest rate of A&E attendances for 5-19 year olds in Lancashire (of the 34 CHPs) with 200 attendances per 1000 5-19 year olds.

A&E attendances for 0-4 year olds are also low with this area ranked 31st of the 34 CHPs where 34 = best. Emergency admissions are also low for its 0-4 year olds

With 2 infant deaths per 1,000 live births over a ten year period, Rossendale West is ranked 2nd lowest (rank 33). Child mortality is also low.

The proportion of children aged 11 who are overweight is quite high with 33% of 11 year olds carrying excess weight (ranked 8th). For reception children this is 22% (ranked 19th).

Age Band	Female	Male	RossendaleWest % Fem	Rossendale West % Male	Lancs % Fem	Lancs % Male
0-1	333	348	5%	5%	5%	5%
