

Lancashire County Council Children & Young People’s Public Health Commissioning—Child Health Profiles 2017

Public Health, assisted by Business Intelligence within Lancashire County Council have created 34 middle level (MSOA* cluster) Child Health Profiles (CHPs). This is because the CHPs on the Public Health England website are only at upper tier level. This does not show the outcome data at sub-district level but just an overview of children and young people’s health across the whole of County. These lower level profiles highlight where children’s health needs are the greatest and opportunities to reduce inequalities are greatest.

LANCASTER COAST

There are 8 primary schools, 1 secondary school with a 6th form and 1 special school in Lancaster Coast.

There are 2 GP practices.

10% of children are living in poverty in Lancaster Coast which is ranked 24th of the 34 CHPs where 34 = best. The highest proportion in Lancashire is 34%.

8% of school children are on free school meals - ranked 23rd.

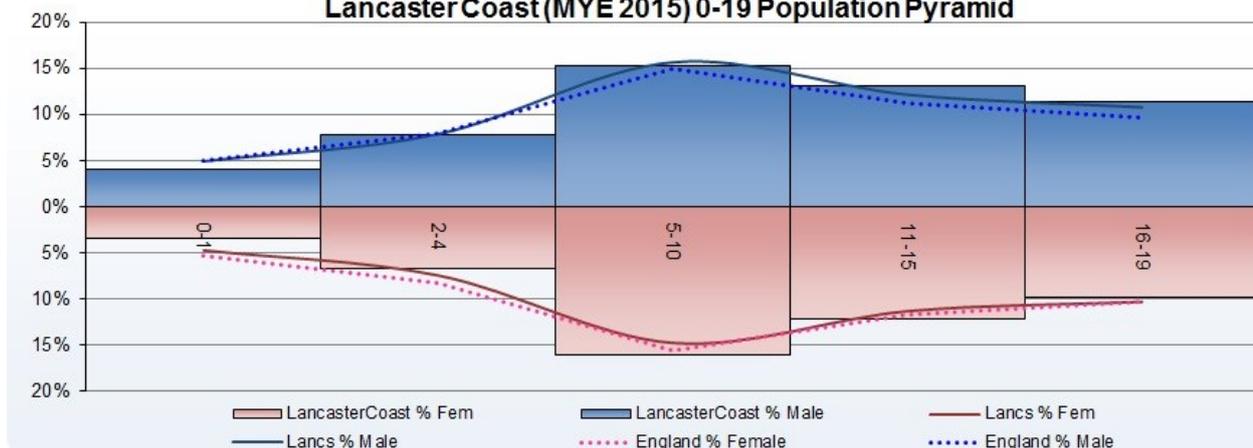

The ‘worst’ indicator is child mortality - ranked 8th with 2.34 deaths per 10,000 children aged 1-17 (7 child deaths over a ten year period).

Lancaster Coast has some of the best outcomes for its children when compared to the other 33 CHPs. It has the lowest rate of its children being killed or seriously injured on Lancashire’s roads, no births to mums aged <20 years (best) just 8 ‘looked after children’ aged 5-17 (33rd) and infant deaths are low with 2.04 deaths per 1000 live births (3 deaths over a ten year period - 31st).

A high proportion of 4/5 year olds achieve a good level of development at the end of reception (77% - 31st).

Age Band	Female	Male	LancasterCoast % Fem	LancasterCoast % Male	Lancs % Fem	Lancs % Male
0-1	120	138	3%	4%	5%	5%
