- For females life expectancy at birth, ranges from 73.2 in Mount to 91.0 in Warren, a gap of 17.9 years.
- Life expectancy at birth for males within the main wards of the neighbourhood ranges from 70.2 in Pharos to 87.2 in Warren, a gap of 17 years.

Source: The England rates were calculated by the ONS, whilst the ward rates were calculated locally by Lancashire council.
Ward level health profile

Analysis of the ward level indicators, on the Public Health England Local Health tool, for the five wards found that all five areas are significantly above England for the following areas:

- Deaths from all causes, all ages (SMR)
- Deaths from all causes, under 75 years (SMR)
- Deliveries to teenage mothers (%)
- Emergency hospital admissions for all causes (SAR)
- General Health - bad or very bad (%)
- Provision of 50 hours or more unpaid care per week (%)
Burden of disease

The neighbourhood has a recorded disease prevalence significantly above England, for 18 out of 20 QoF indicators examined.

Red font = Significantly above England, Blue = Significantly below
