

## Lancashire County Council Children & Young People's Public Health —Child Health Profiles 2017

Public Health, assisted by Business Intelligence within Lancashire County Council have created 34 middle level (MSOA\* cluster) Child Health Profiles (CHPs). This is because the CHPs on the Public Health England website are only at upper tier level. This does not show the outcome data at sub-district level but just an overview of children and young people's health across the whole of County. These lower level profiles highlight where children's health needs are the greatest and opportunities to reduce inequalities are greatest.

### PENDLE HILL

Pendle Hill is predominantly in the district of Ribble Valley but also encompasses the least deprived MSOAs in the district of Pendle. The most deprived ward is in Clitheroe and this is the 4th decile nationally (1 = most deprived).

There are 20 primary schools, 4 secondary schools and 2 independent schools.

There are 4 GP practices.

Health is generally good in Pendle Hill with the 'worst' indicator being the number of looked after children (ranked 14th of the 34 CHPs where 1 = worst). This may be due to

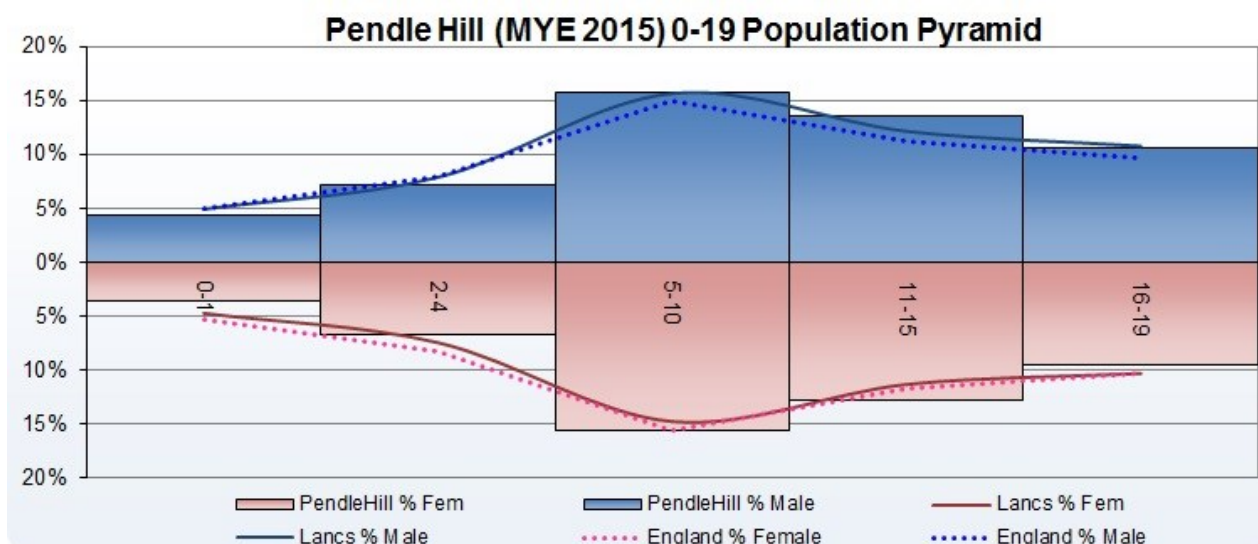

foster children moving to more affluent areas with more well off families.

Just 6.6% of children are living in poverty (30th) and child mortality is low (32nd).

76% of 5 year olds achieve a good level of development at the end of reception (25th), 64% of 11 year olds achieve key stage 2 (31st) and 67% key stage 4 (26th).

A high proportion of new mums in the DISTRICT of Ribble Valley are however still smoking at the end of their maternity.

Age Band	Female	Male	PendleHill % Fem	PendleHill % Male	Lancs % Fem	Lancs % Male
0-1	328	389	4%	4%	5%	5%
2-4	600	642	7%	7%	7%	8%
5-10	1400	1412	16%	16%	15%	16%
11-15	1142	1212	13%	14%	11%	12%
16-19	855	948	10%	11%	10%	11%
Total	4325	4603	48%	52%	49%	51%

\* MSOA - Middle Layer Super Output Areas are built from groups of Lower Layer Super Output Areas. The minimum population is 5000 and the mean is 7200

## Lancashire County Council Children & Young People's Public Health —Child Health Profiles 2017

Indicators are ranked according to their position within the 34 MSOA clusters created throughout Lancashire. The colour ramp indicates in which quintile the value is located. The top seven being **red** (worst 5th), the next seven being **orange** (2nd worst 5th) the mid 6 being **yellow** (middle 5th) the next to best seven being **blue** (2nd best fifth) and the lowest seven being **green** (best 5th)

Top 5 'worst' indicators	Rank	Value
No of looked after children aged 5-17 as of 31st March 2017	14	NEW 33
Infant deaths per 1,000 live births, 2006-2015	19	↓ 3.78
