

Weekly update for coronavirus figures in the county

Wednesday 22 July 2020

How is coronavirus affecting people in Lancashire?

This is a weekly bulletin produced by the Lancashire Resilience Forum with the latest figures on the number of coronavirus-related cases and deaths in the county, as well as figures at a unitary and district level.

It also shows how Lancashire compares to other areas of the country.

Cumulative number of lab-confirmed cases under pillar 1 and pillar 2 up to 19 July

LANCASHIRE

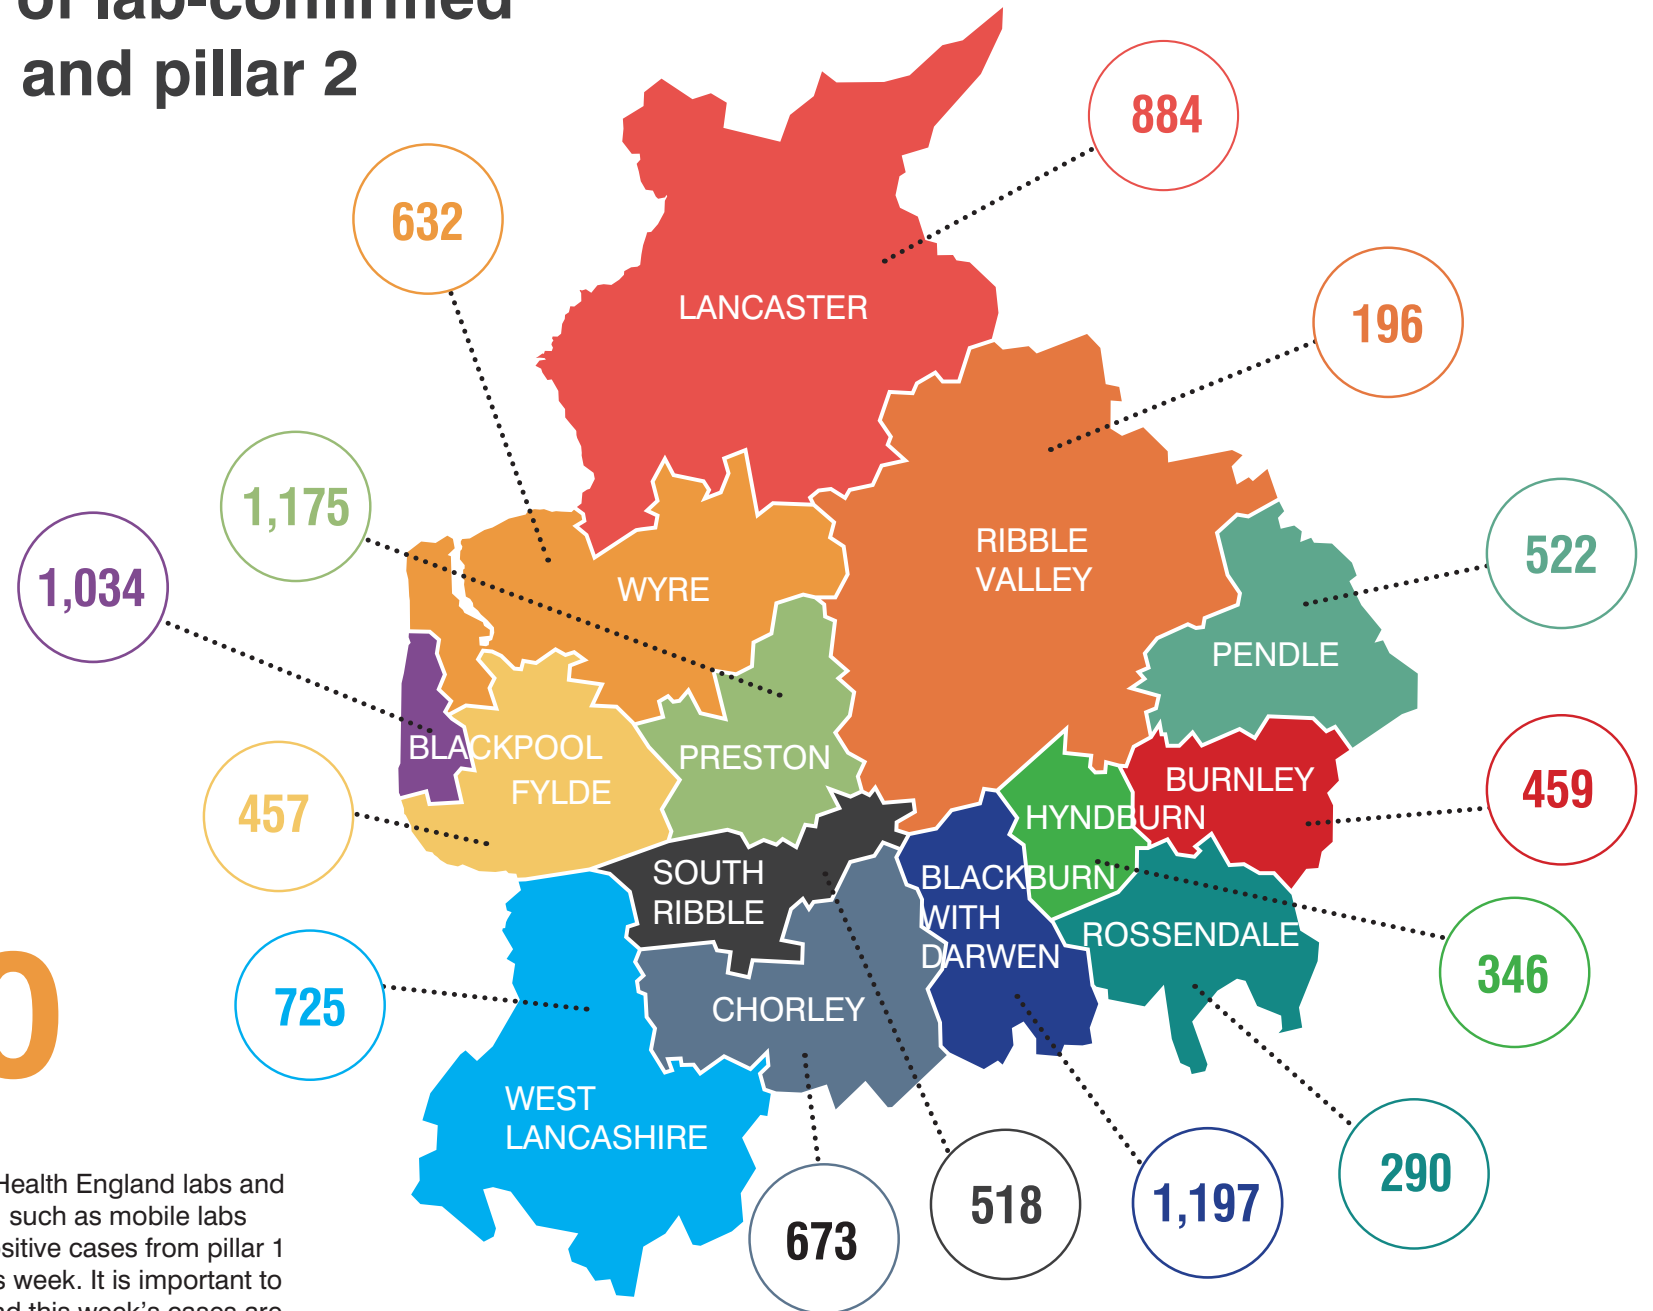

9,108

NORTH WEST

44,331

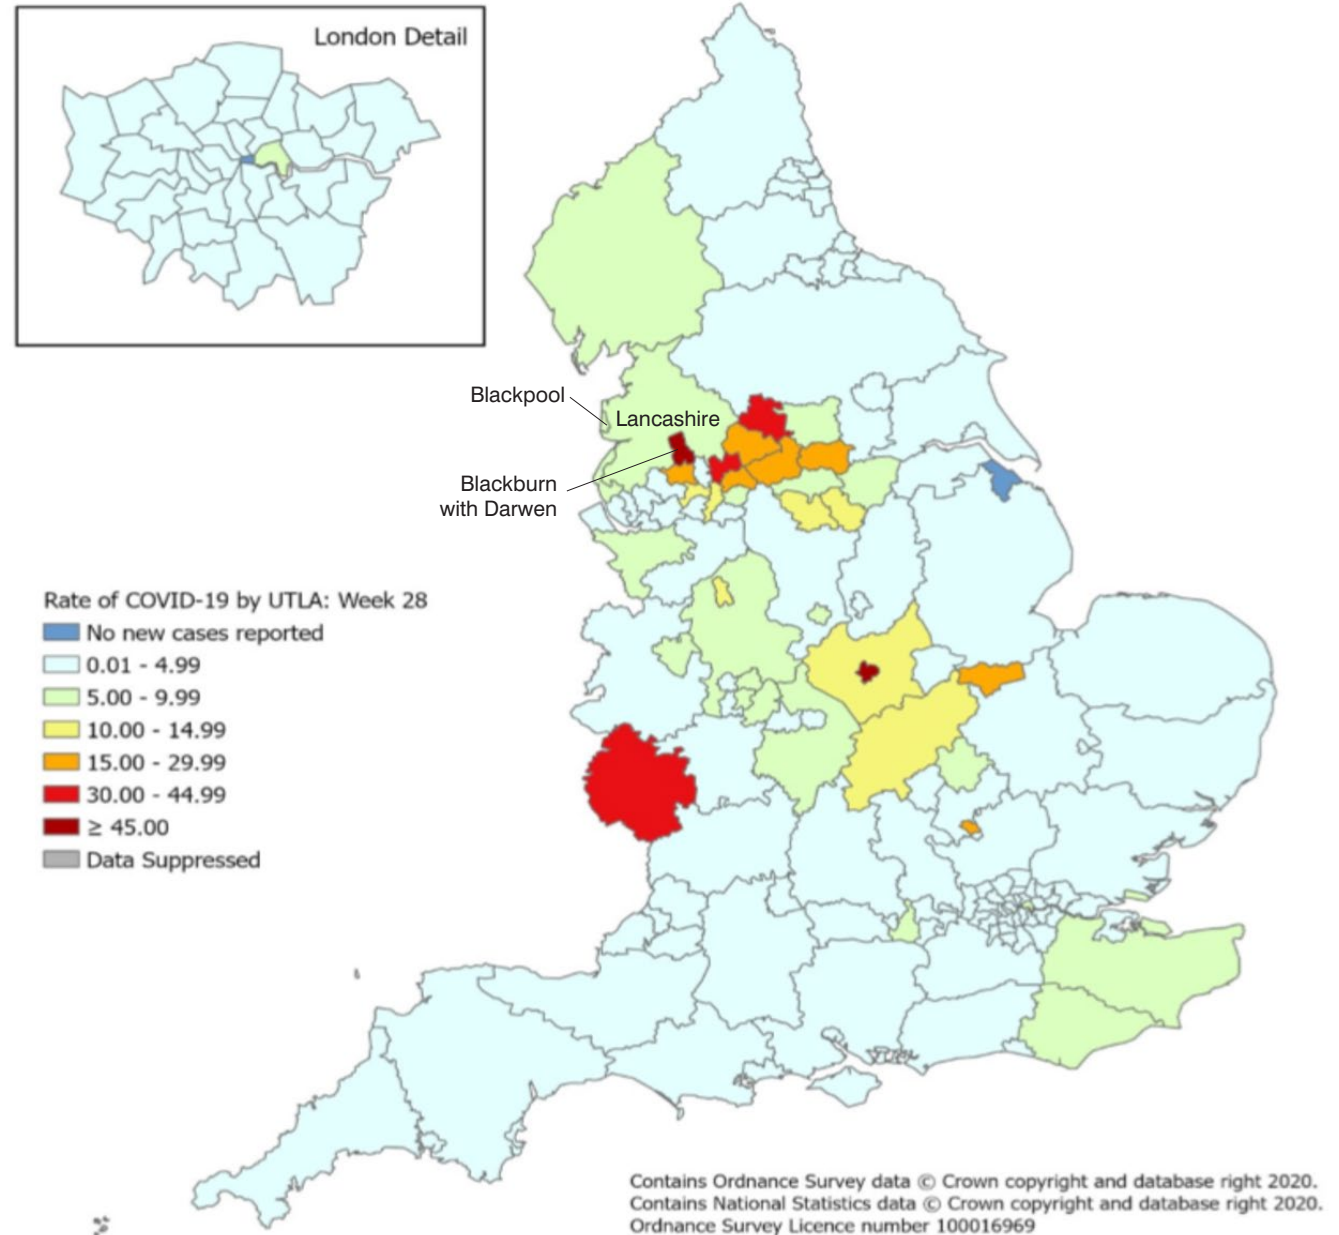

ENGLAND

254,120

These figures are from tests carried out in Public Health England labs and in the NHS (Pillar 1) and from other testing routes, such as mobile labs (Pillar 2). 24 June and 1 July bulletins included positive cases from pillar 1 only, hence the counts are lower than they are this week. It is important to note that the cases haven't suddenly increased and this week's cases are based on both pillars.

Weekly rate of Covid-19 cases per 100,000 population tested under pillar 1 and pillar 2 (Week ending 12 July)

These figures are from tests carried out in Public Health England labs and in the NHS (Pillar 1) and from other testing routes, such as mobile labs (Pillar 2). 24 June and 1 July bulletins included positive cases from pillar 1 only, hence the counts are lower than they are this week. It is important to note that the cases haven't suddenly increased and this week's cases are based on both pillars.

Cumulative lab-confirmed cases up to 19 July, rate per 100,000

Cases are from both pillar 1 and 2

Daily pillar 1 and pillar 2 lab-confirmed cases to 19 July

Positive tests are counted on the day a sample was taken. But this data is only updated when results are known. This will affect the greyed-out column in the chart.
