

Lancashire County Council is in contact with all schools and care homes in the area and will provide specific advice to these facilities in the event of an emergency. These facilities should maintain contact through existing communication channels for further advice and information.

During any Springfields Fuels Limited Radiation Emergency

Any Springfields Fuels Limited radiation emergency response will be co-ordinated by Lancashire's emergency services, local authorities, health authorities and the Environment Agency, supported by the site operators and national agencies.

Detailed advice and information will be put out through local TV and radio and other channels, such as the web and social media. Lancashire Constabulary and

Lancashire County Council will lead on issuing this information, with the support of Springfields Fuels Limited and other local organisations involved in managing the response.

Keep updated

You can keep up to date with advice during an emergency at Springfields by tuning into BBC Radio Lancashire 95.5 FM and visiting your local BBC News website.

Does this apply to me?

This leaflet provides awareness of radiation emergency arrangements for people who lived beyond the Springfields Fuels Limited Detailed Emergency Planning Zone (DEPZ) and within the 5km Outline Emergency Planning Zone. It is unlikely that you will be asked to take immediate actions in the event of a radiation emergency but this leaflet provides information on steps that might be taken in the unlikely event of a severe radiation emergency.

Information about what to do in the event of a radiation emergency at the Springfields Fuels Limited site is routinely provided by Lancashire County Council to people who live within the Springfields DEPZ. This is an area set by Radiation (Emergency Preparedness & Public Information) Regulations 2019.

What is the Outline Planning Zone?

Over many years the UK has developed, and refined, detailed plans for how the response to a nuclear emergency should be managed. There has never been a nuclear incident in the UK that required the activation of these plans, but it's important they exist and are reviewed.

Councils with nuclear facilities in their areas, and nearby, have recently been required to review these plans and create additional strategic level plans for wider areas

around these sites. These are known as Outline Planning Zones.

Protective arrangements for people in the Outline Planning Zone would only be activated if it was determined the risk from the event extended beyond the area for which detailed emergency plans already exist. If the plan for the wider area was activated it would be a decision based on the best available information as opposed to previously developed planning assumptions.

The Outline Planning Zone surrounding Springfields Fuels Limited is 5km. Outline Planning Zones are always circles around specific sites and defining the zone this way allows those who will have to respond to such an event, such as police, fire and other emergency services, to draft public protection plans ready to be put into operation.

How will I know if there is a radiation emergency?

The emergency services will alert people of a radiation emergency at Springfields Fuels Limited all the channels available to them, including the news media (local TV and radio), web and social media. In addition, schools and care homes will be alerted directly by Lancashire local authorities.

Will I be affected and what should I do?

If radiation is released from the site, people can be exposed by breathing in radioactive material; being directly exposed to radioactive material in the air or deposited on surfaces; and/or eating and drinking food contaminated by radioactive material.

You may be advised to go indoors or stay indoors, with windows and doors closed, to reduce the risk of breathing in or coming into direct contact with any radioactive material which may be deposited.

The emergency services will issue information, advice and instructions on what action (if any) you should take through local media. Therefore, it is important that you 'stay in' and tune in.

However, it is only people who are within the DEPZ of the site who would immediately be advised to stay indoors.

What can I eat and drink?

If there are any restrictions on food and drink during an emergency at Springfields, they will be communicated by local TV and radio. Prior to any announcement of any food or drink restrictions, you should avoid eating uncovered food, such as fresh vegetables from the garden. It should be safe to drink/use fresh tap water and to consume covered food and drink that you already have within your house.

Should I leave the area?

It is unlikely that anyone who lives around the Springfields Fuels Limited site will be advised to evacuate immediately. After assessing the hazard, the emergency services may subsequently advise people to evacuate or to take shelter.

If a wider evacuation is necessary, you will be told which routes to use to leave the area via local TV and radio, or by door to door visits by the emergency services. Rest Centres will be set up to care for people unable to make their own arrangements.
