

# Weekly update for coronavirus figures in the county

Wednesday 9 December 2020

## How is coronavirus affecting people in Lancashire?

This is a weekly bulletin produced by the Lancashire Resilience Forum with the latest figures on the number of coronavirus-related cases and deaths in the county, as well as figures at a unitary and district level.

It also shows how Lancashire compares to other areas of the country.

Confirmed cases from positive  
'pillar 1 and 2' tests up to  
8 December 2020

LANCASHIRE

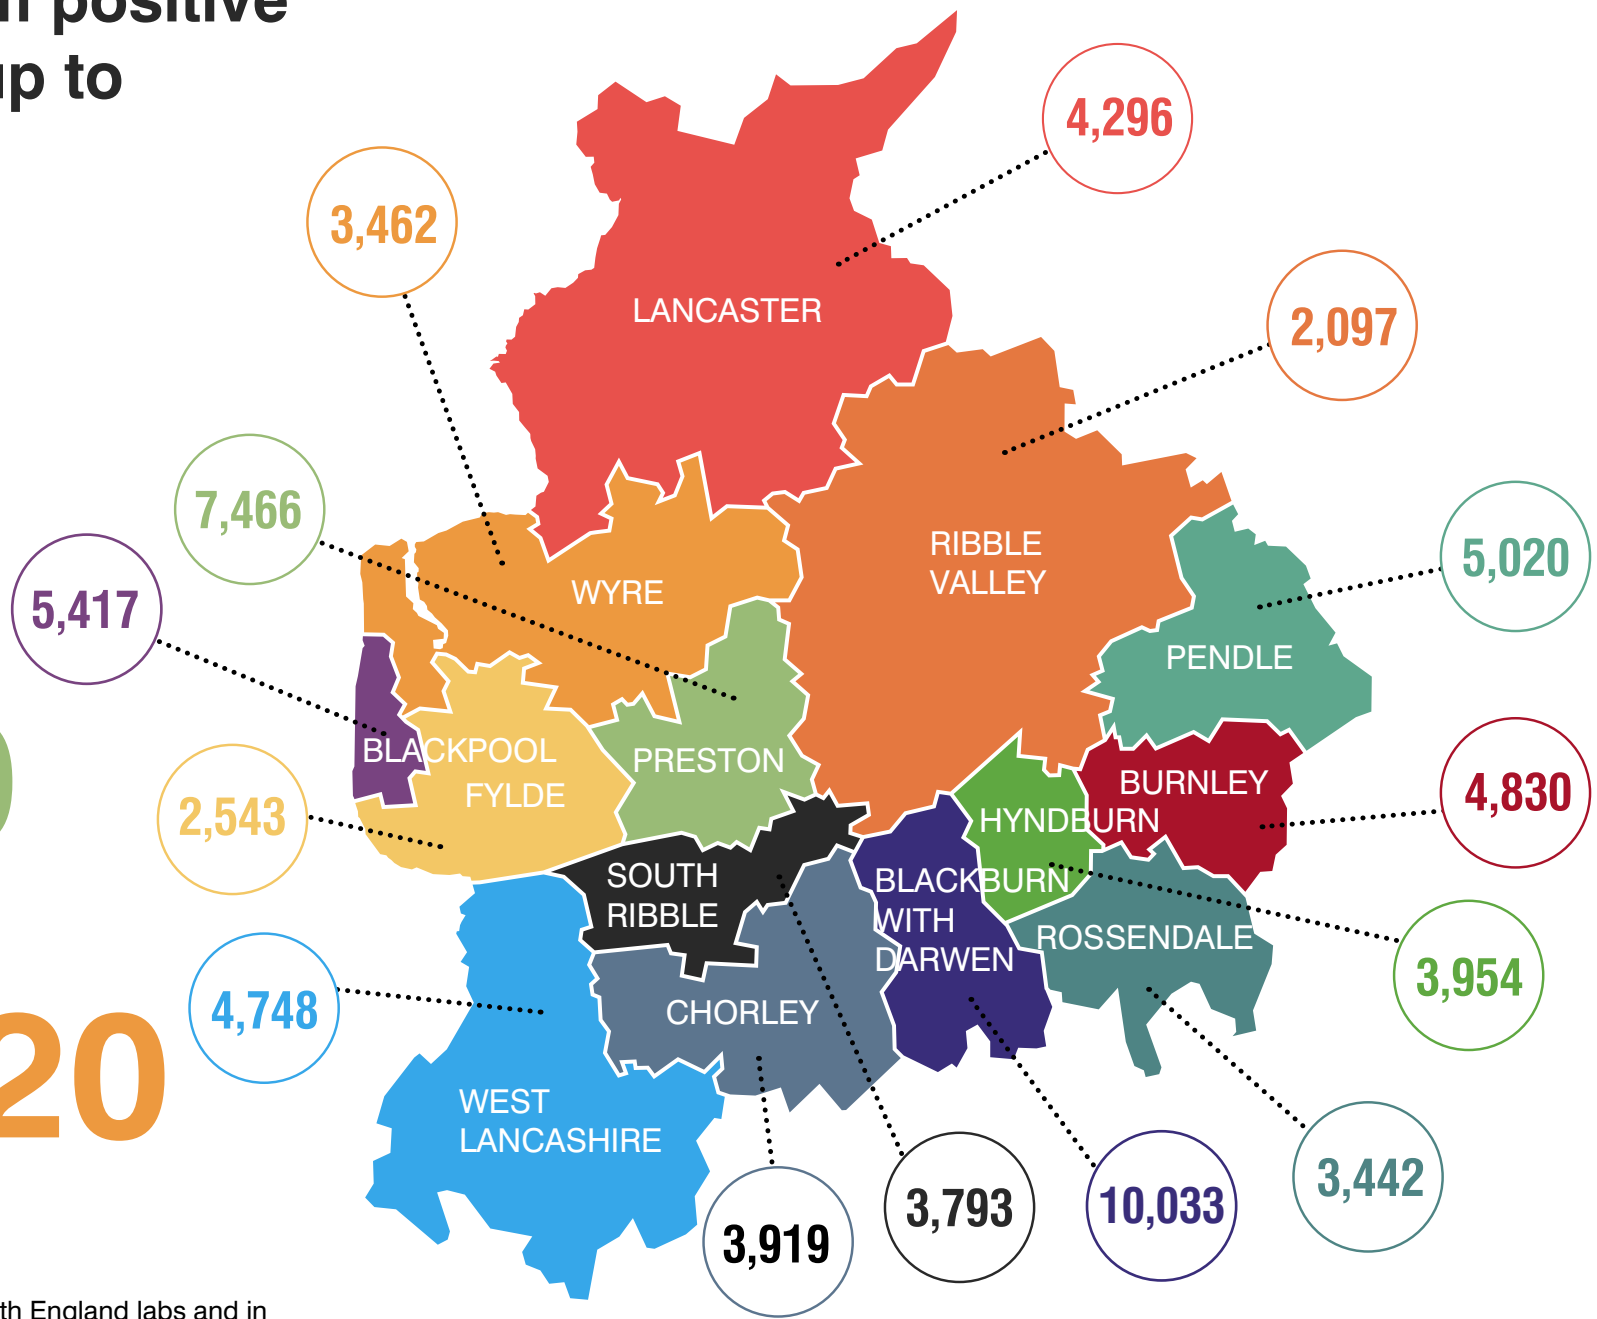

65,020

NORTH WEST

316,170

ENGLAND

1,490,720

These figures are from tests carried out in Public Health England labs and in the NHS (Pillar 1) and from other testing routes, such as mobile labs (Pillar 2).

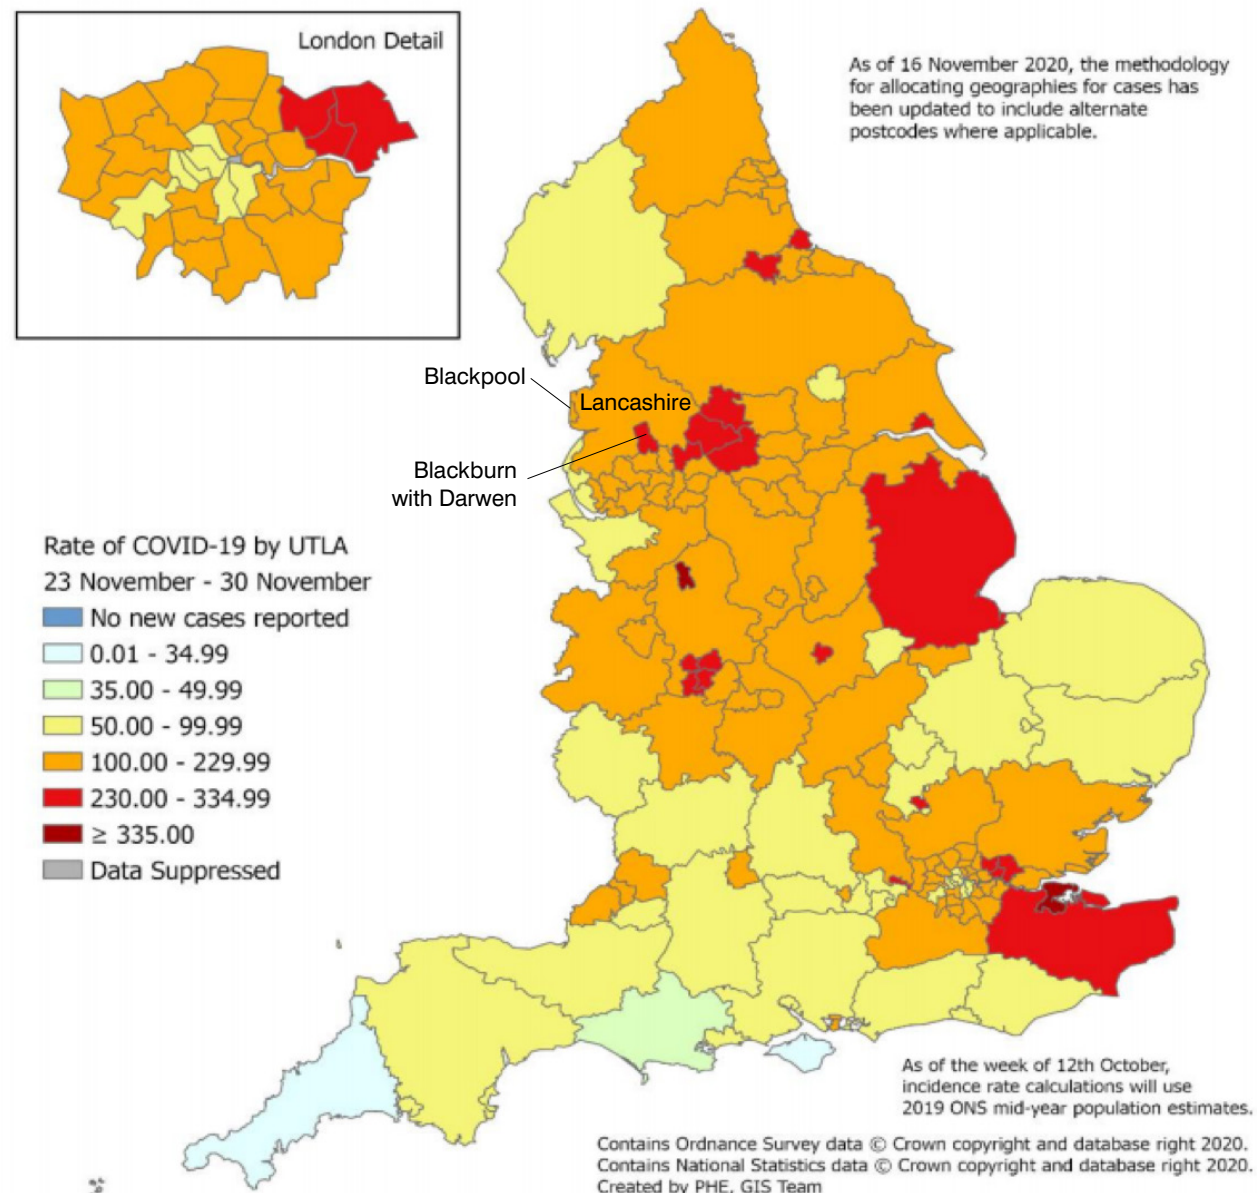

# Weekly rate of Covid-19 cases per 100,000 population tested under pillar 1 and pillar 2 (Week 48 - data between 23 November and 29 November 2020).

For rate of cases detected via Pillar 1 & 2 testing:

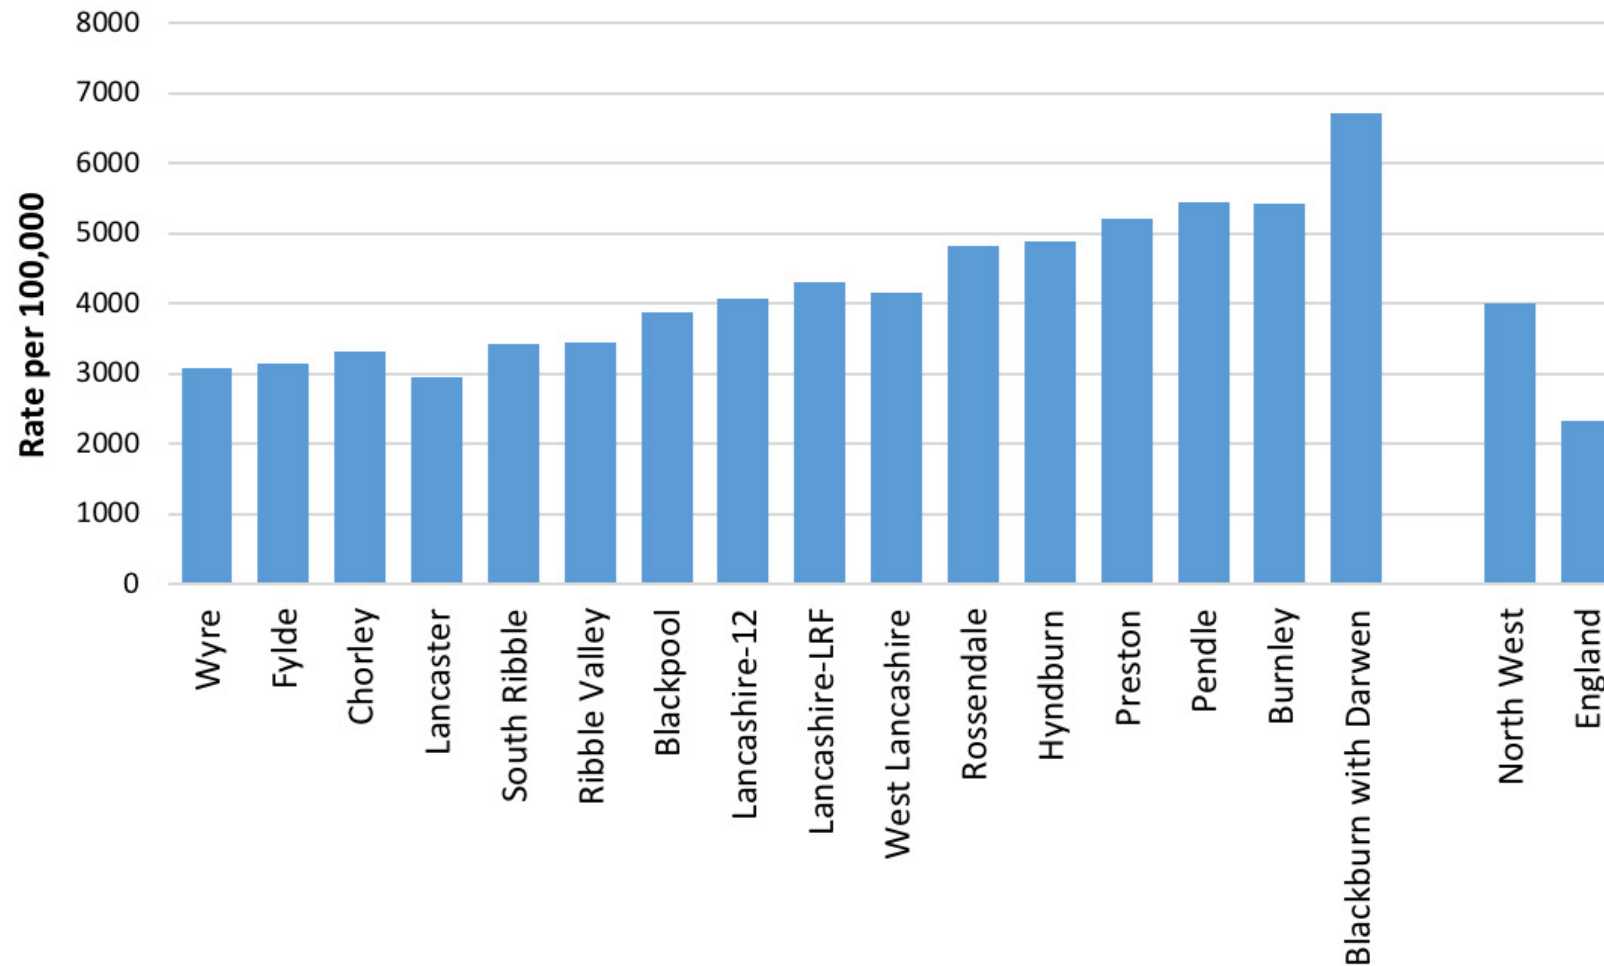

Once again a major improvement for the Lancashire 14 as they move down to the middle range categories.

Pillar 1 = swab testing in PHE labs & NHS hospitals for those with a medical need and key workers & their families

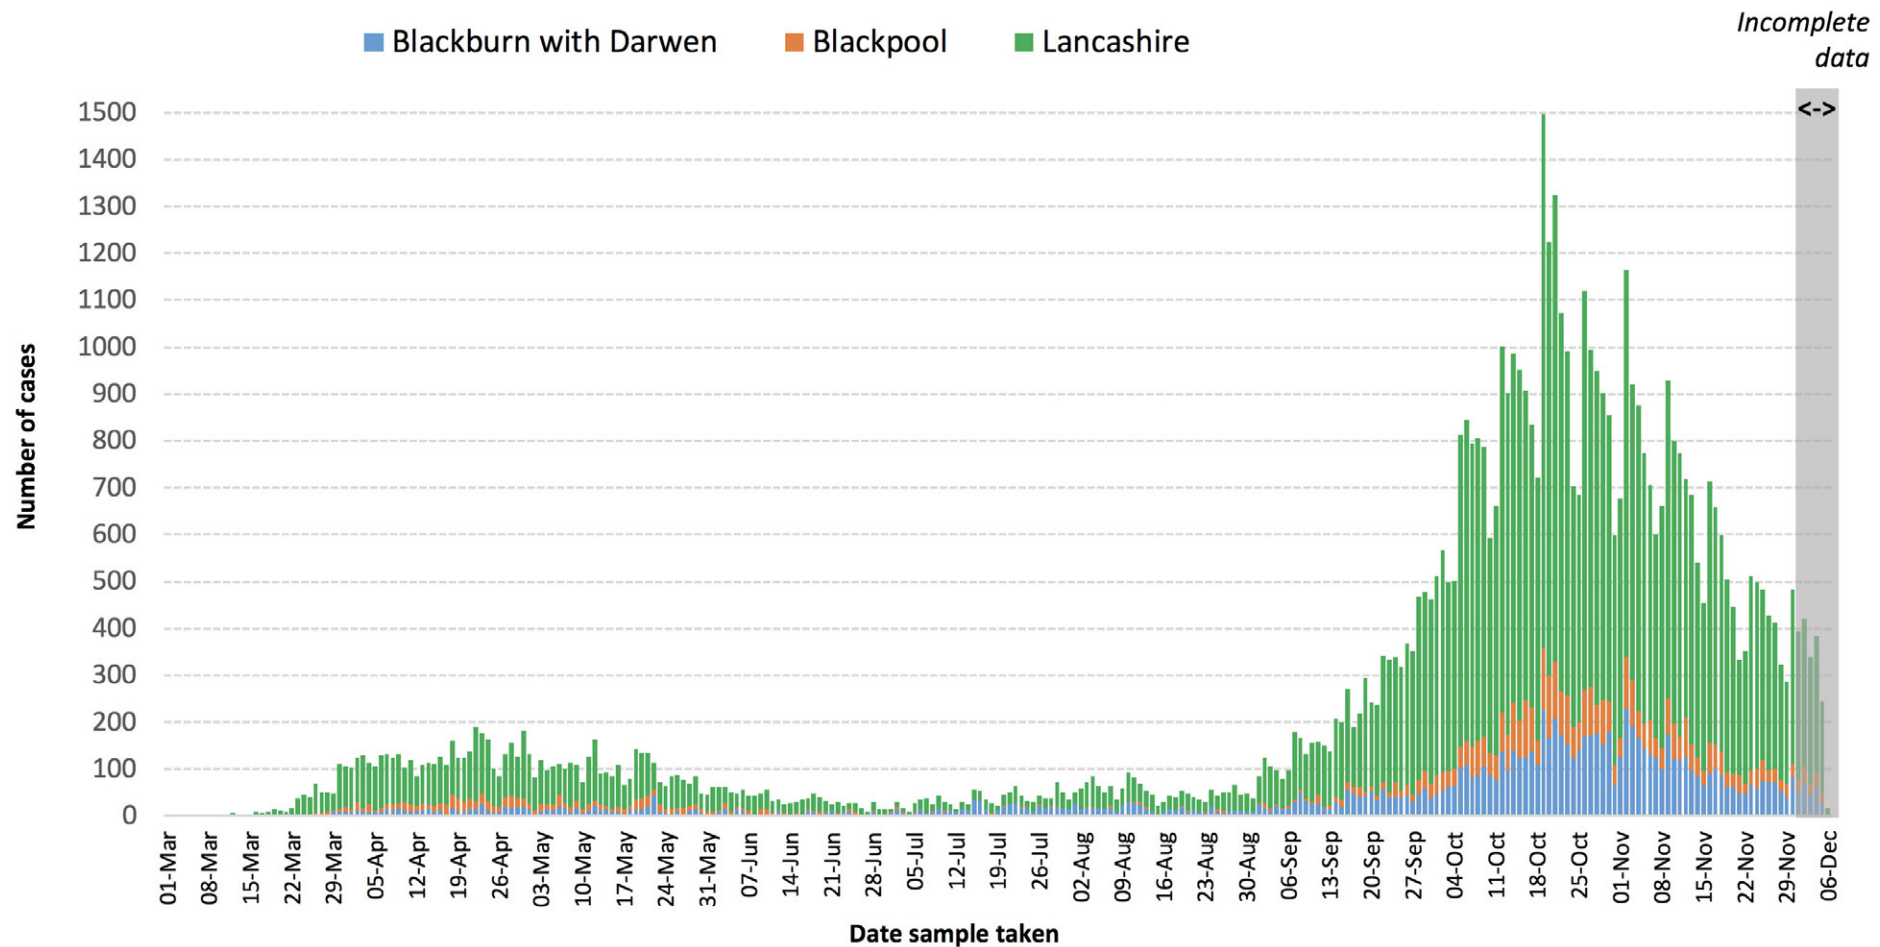

Pillar 2 = testing by commercial partners - swab testing for the wider population from out in the community

# Cumulative lab-confirmed cases up to 8 December 2020, rate per 100,000

# Daily pillar 1 and pillar 2 lab-confirmed cases to 6 December

Positive tests are counted according to the date the sample was taken. However, most swabs taken in recent days will not yet have produced a result, so it is important not to jump to the conclusion that the epidemic is tailing off quicker than it really is. The PHE website cautions that only data from five days or more ago can be considered complete. The greyed-out columns in figure above are liable to be added to as more results come in.

Figures relating to confirmed cases by Upper Tier Local Authority can be downloaded from: <https://coronavirus.data.gov.uk>

The hospital admission figures are of people who had a confirmed case of COVID-19 in the 14 days prior to admission.

The weekly inpatient diagnoses are patients who received a confirmed COVID diagnosis after being admitted to hospital.

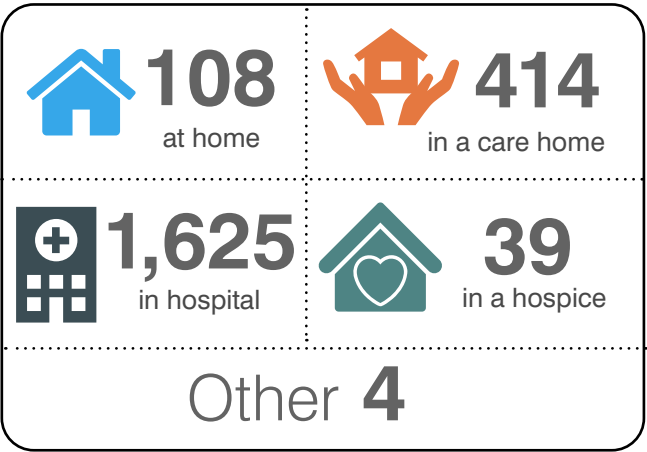

The in hospital data used is a subset of the data that is published monthly by the NHS here: <https://www.england.nhs.uk/statistics/statistical-work-areas/covid-19-hospital-activity/> It will not be made available at an organisation level.

Figures only include data for NHS Acute Trusts

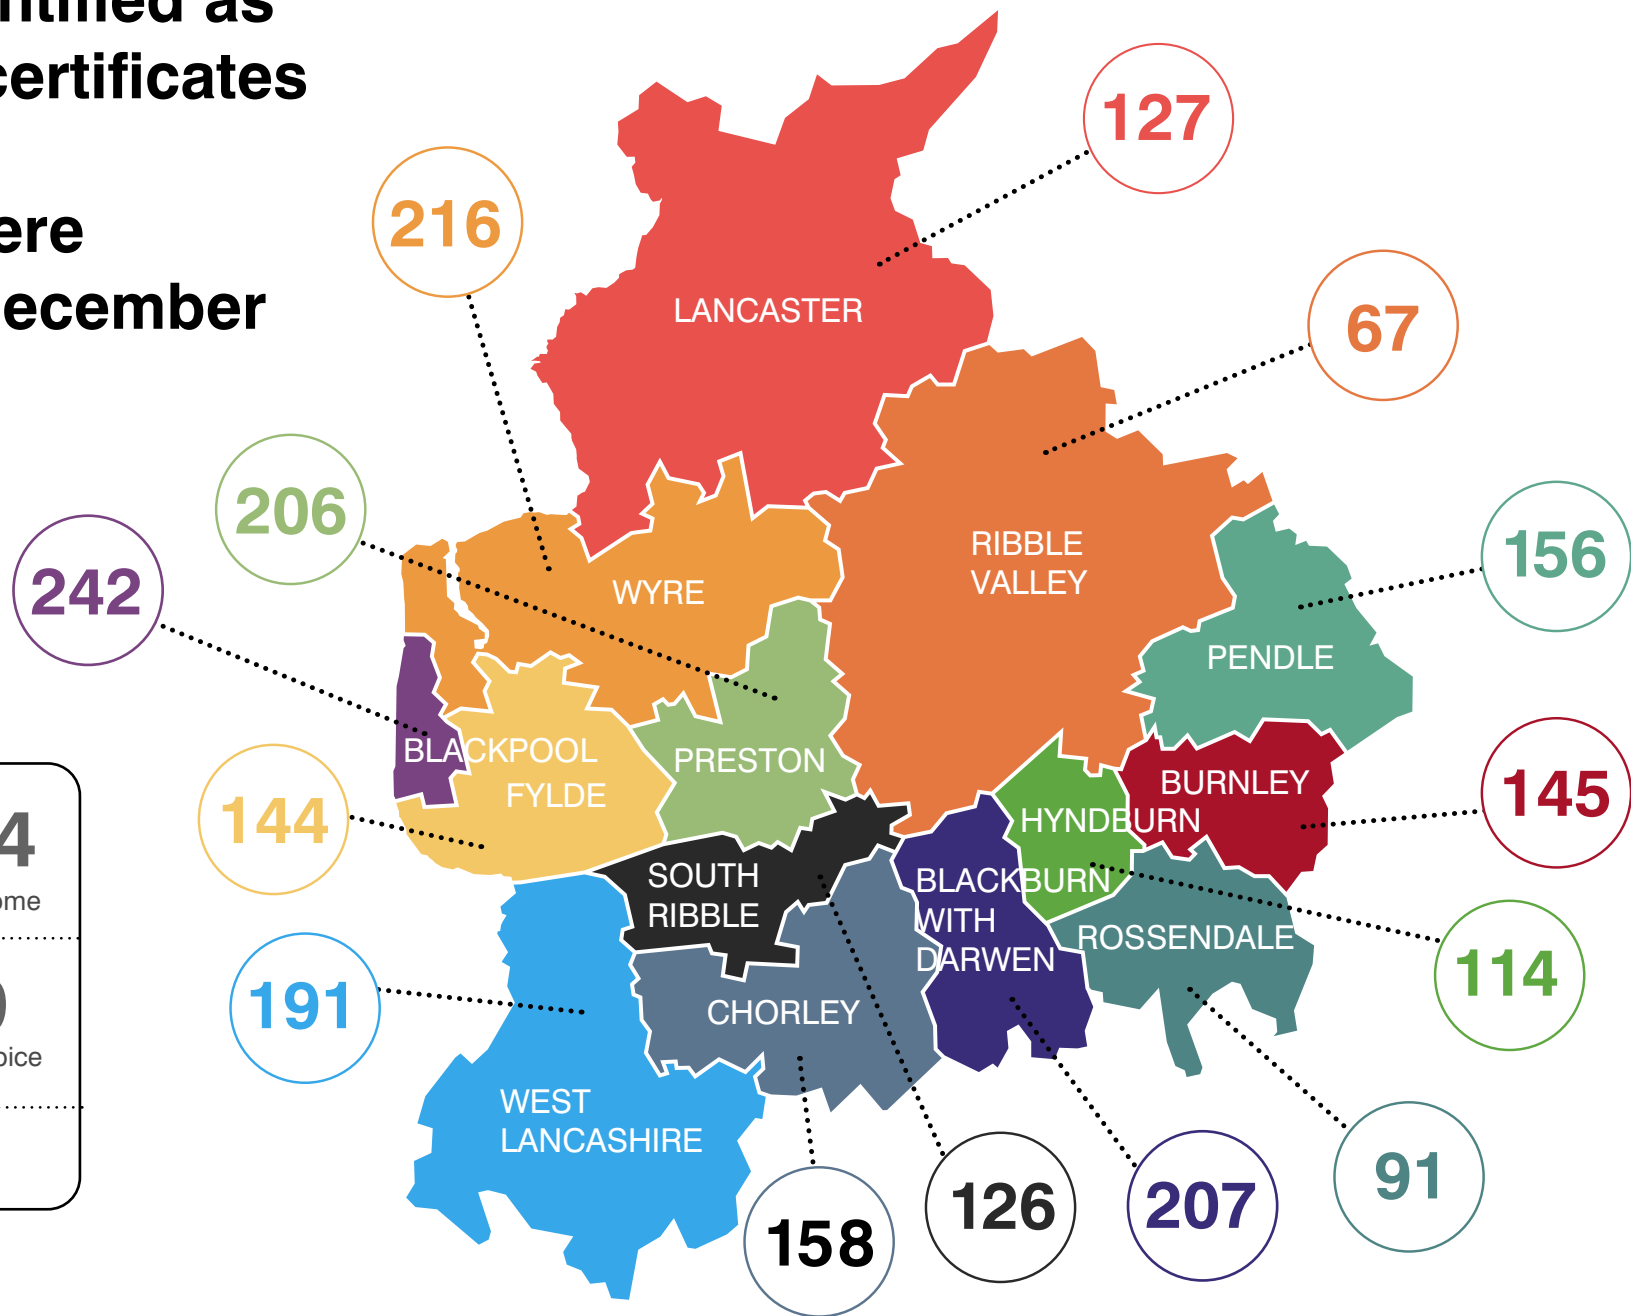

East Lancashire did not provide a submission to the COVID-19 sitrep on 10 November.
