# Weekly update for coronavirus figures in the county

## Wednesday 20 January 2021

### How is coronavirus affecting people in Lancashire?

This is a weekly bulletin produced by the Lancashire Resilience Forum with the latest figures on the number of coronavirus-related cases and deaths in the county, as well as figures at a unitary and district level.
It also shows how Lancashire compares to other areas of the country.
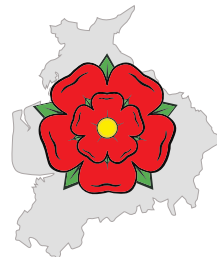

**Lancashire Resilience Forum**

# Confirmed cases from positive 'pillar 1 and 2' tests up to 18 January 2021

**LANCASHIRE**

# 97,968

**ENGLAND**

# 2,992,238

These figures are from tests carried out in Public Health England labs and in the NHS (Pillar 1) and from other testing routes, such as mobile labs (Pillar 2).

Created by PHE, GIS Team

For rate of cases detected via Pillar 1 & 2 testing:
Lancashire 14 in the main remains in the highest and most severe range category.

Pillar 1 = swab testing in PHE labs & NHS hospitals for those with a medical need and key workers & their families
Pillar 2 = testing by commercial partners - swab testing for the wider population from out in the community

# Cumulative lab-confirmed cases up to 18 January 2021, rate per 100,000

Cases are from both pillar 1 and 2
# Daily pillar 1 and pillar 2 lab-confirmed cases to 17 January 2021

Positive tests are counted according to the date the sample was taken. However, most swabs taken in recent days will not yet have produced a result, so it is important not to jump to the conclusion that the epidemic is tailing off quicker than it really is. The PHE website cautions that only data from five days or more ago can be considered complete. The greyed-out columns in figure above are liable to be added to as more results come in.
