

# Weekly update for coronavirus figures in the county

17 March 2021

## How is coronavirus affecting people in Lancashire?

This is a weekly bulletin produced by the Lancashire Resilience Forum with the latest figures on the number of coronavirus-related cases and deaths in the county, as well as figures at a unitary and district level.

It also shows how Lancashire compares to other areas of the country.

# Confirmed cases from positive 'pillar 1 and 2' tests up to 14 March 2021

LANCASHIRE

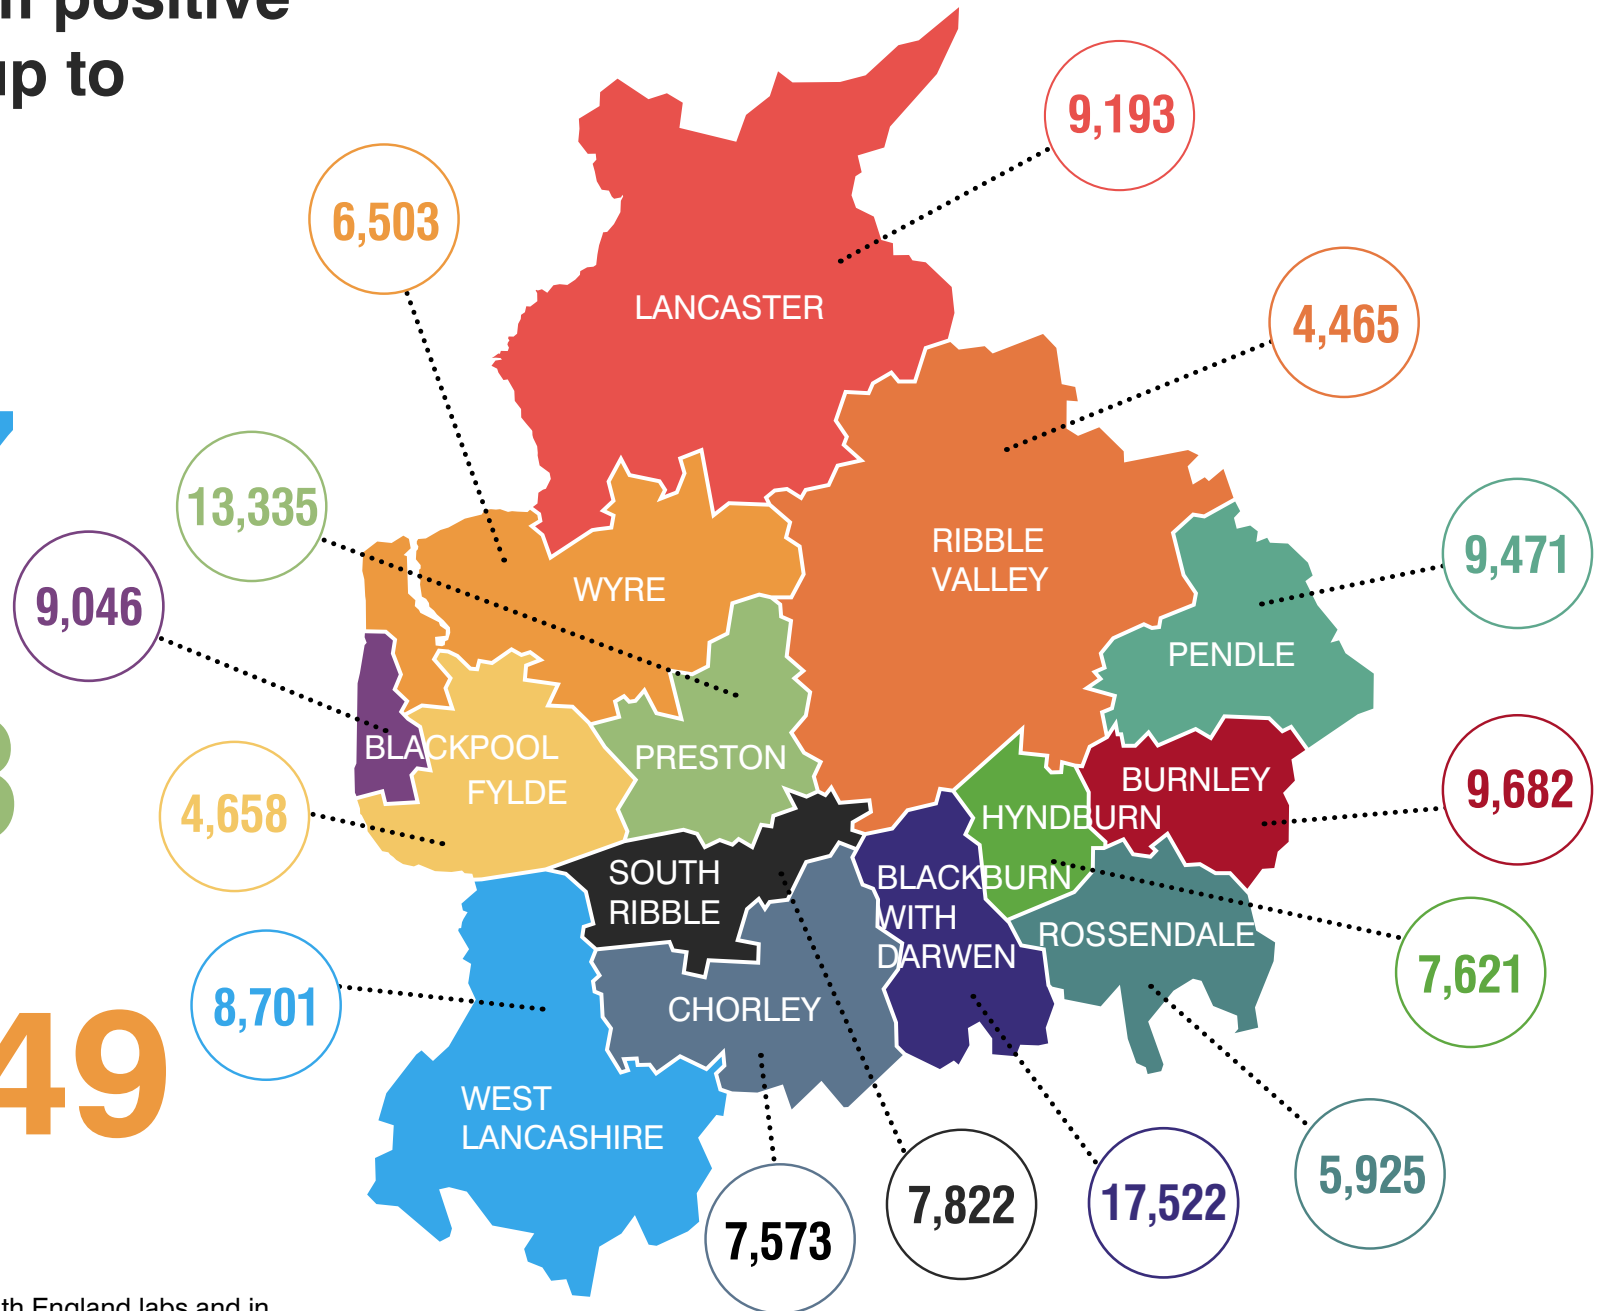

121,517

NORTH WEST

588,048

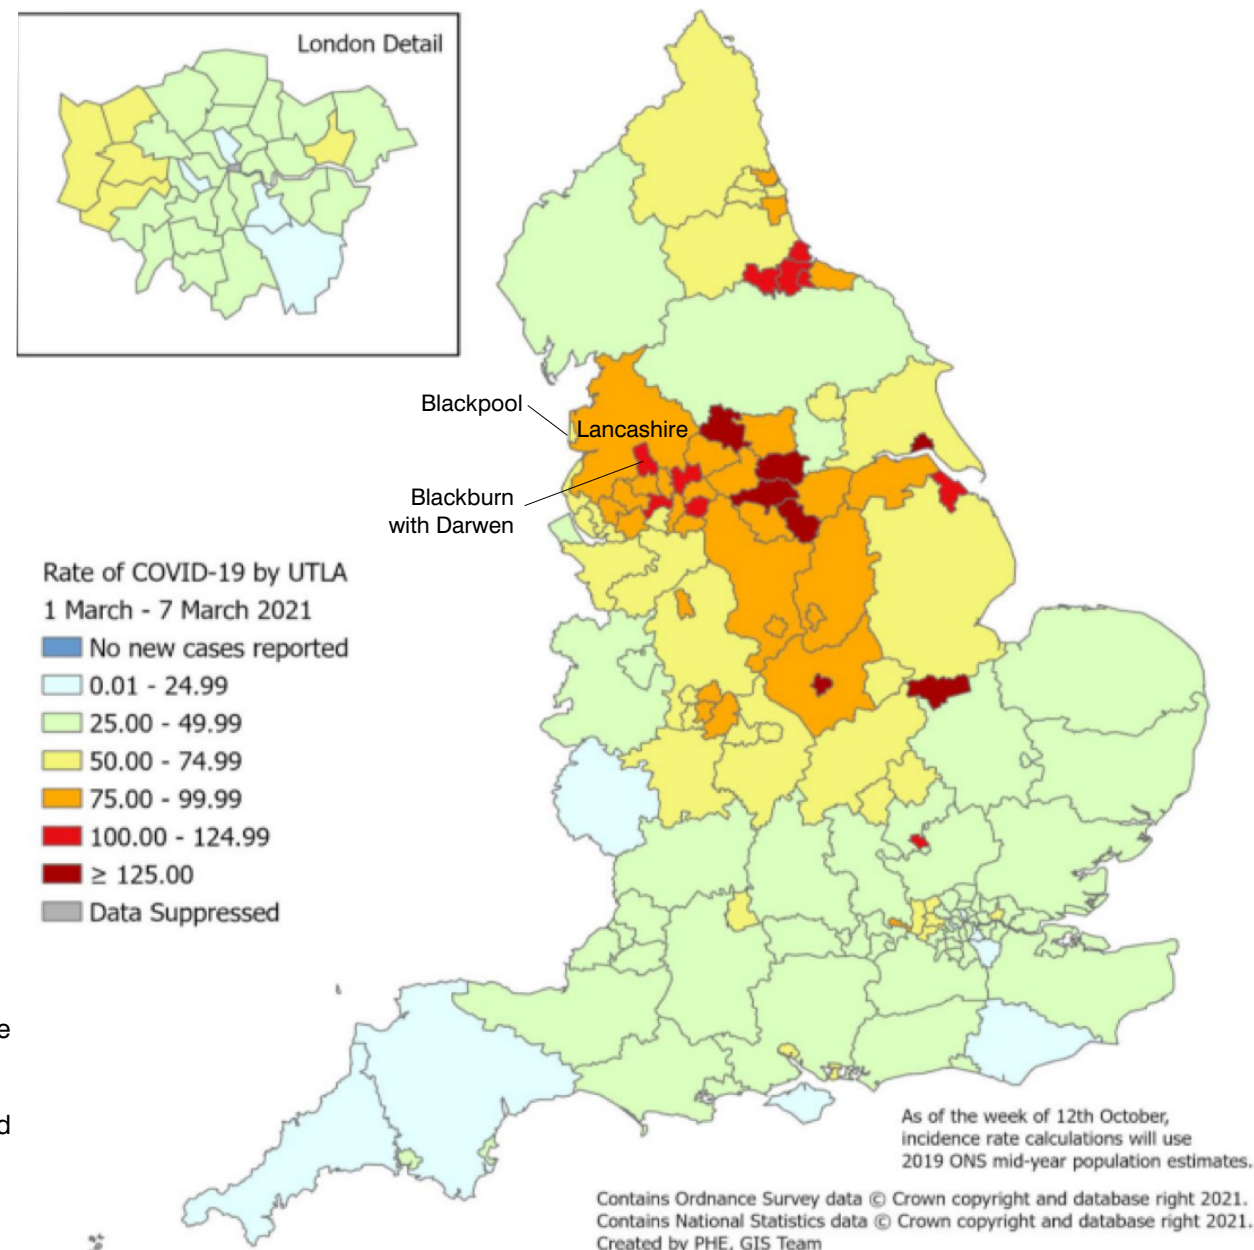

ENGLAND

3,731,849

These figures are from tests carried out in Public Health England labs and in the NHS (Pillar 1) and from other testing routes, such as mobile labs (Pillar 2).

# Weekly rate of Covid-19 cases per 100,000 population tested under pillar 1 and pillar 2 (Week 9 - data between 1 March and 7 March 2021).

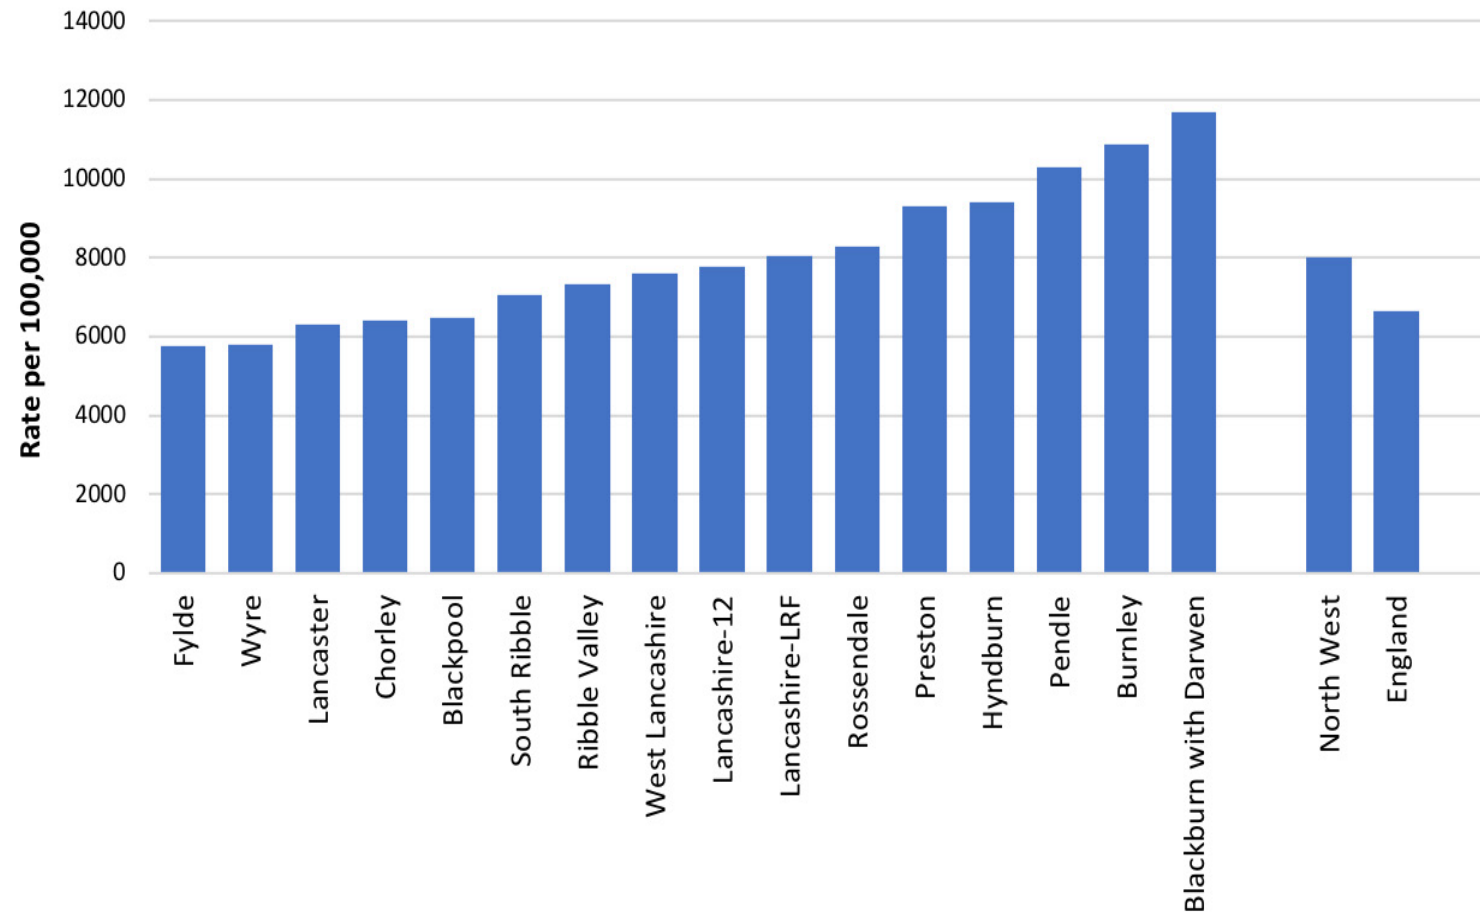

For rate of cases detected via Pillar 1 & 2 testing:

Blackpool's rate is in the third lowest band, Blackburn with Darwen's rate is in the second highest rate band and Lancashire's rate is in the third highest rate band

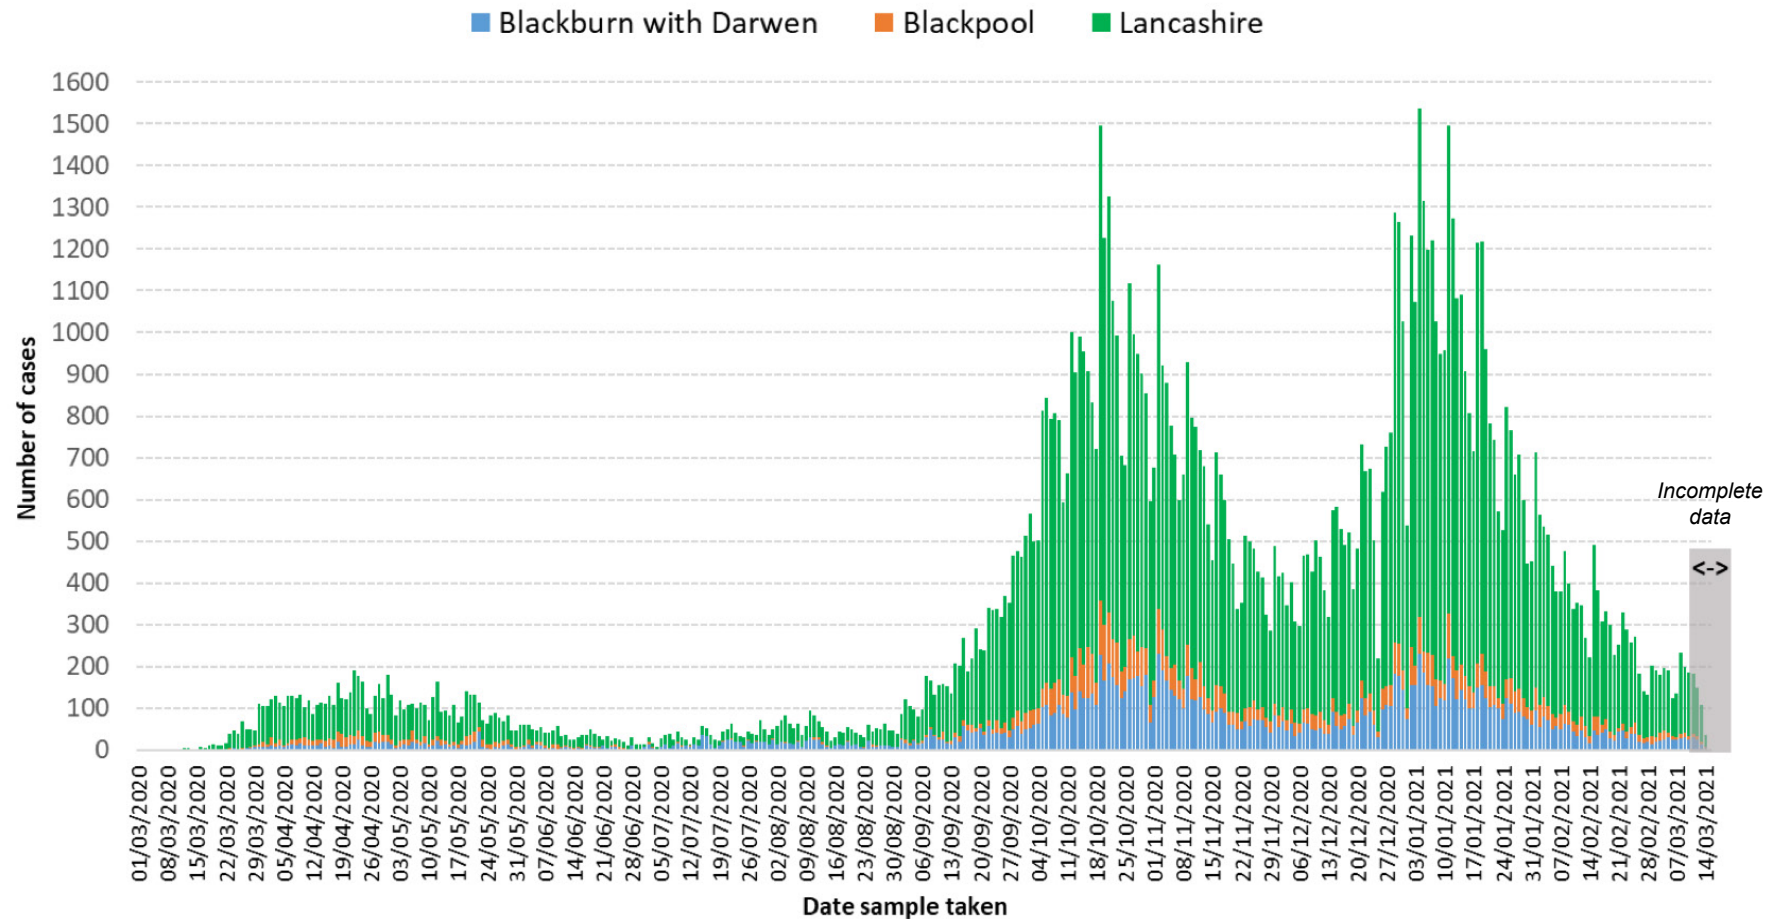

Pillar 1 = swab testing in PHE labs & NHS hospitals for those with a medical need and key workers & their families

Pillar 2 = testing by commercial partners - swab testing for the wider population from out in the community

# Cumulative lab-confirmed cases up to 14 March 2021, rate per 100,000

# Daily pillar 1 and pillar 2 lab-confirmed cases to 14 March 2021

Positive tests are counted according to the date the sample was taken. However, most swabs taken in recent days will not yet have produced a result, so it is important not to jump to the conclusion that the epidemic is tailing off quicker than it really is. The PHE website cautions that only data from five days or more ago can be considered complete. The greyed-out columns in figure above are liable to be added to as more results come in.

The hospital admission figures are of people who had a confirmed case of COVID-19 in the 14 days prior to admission.

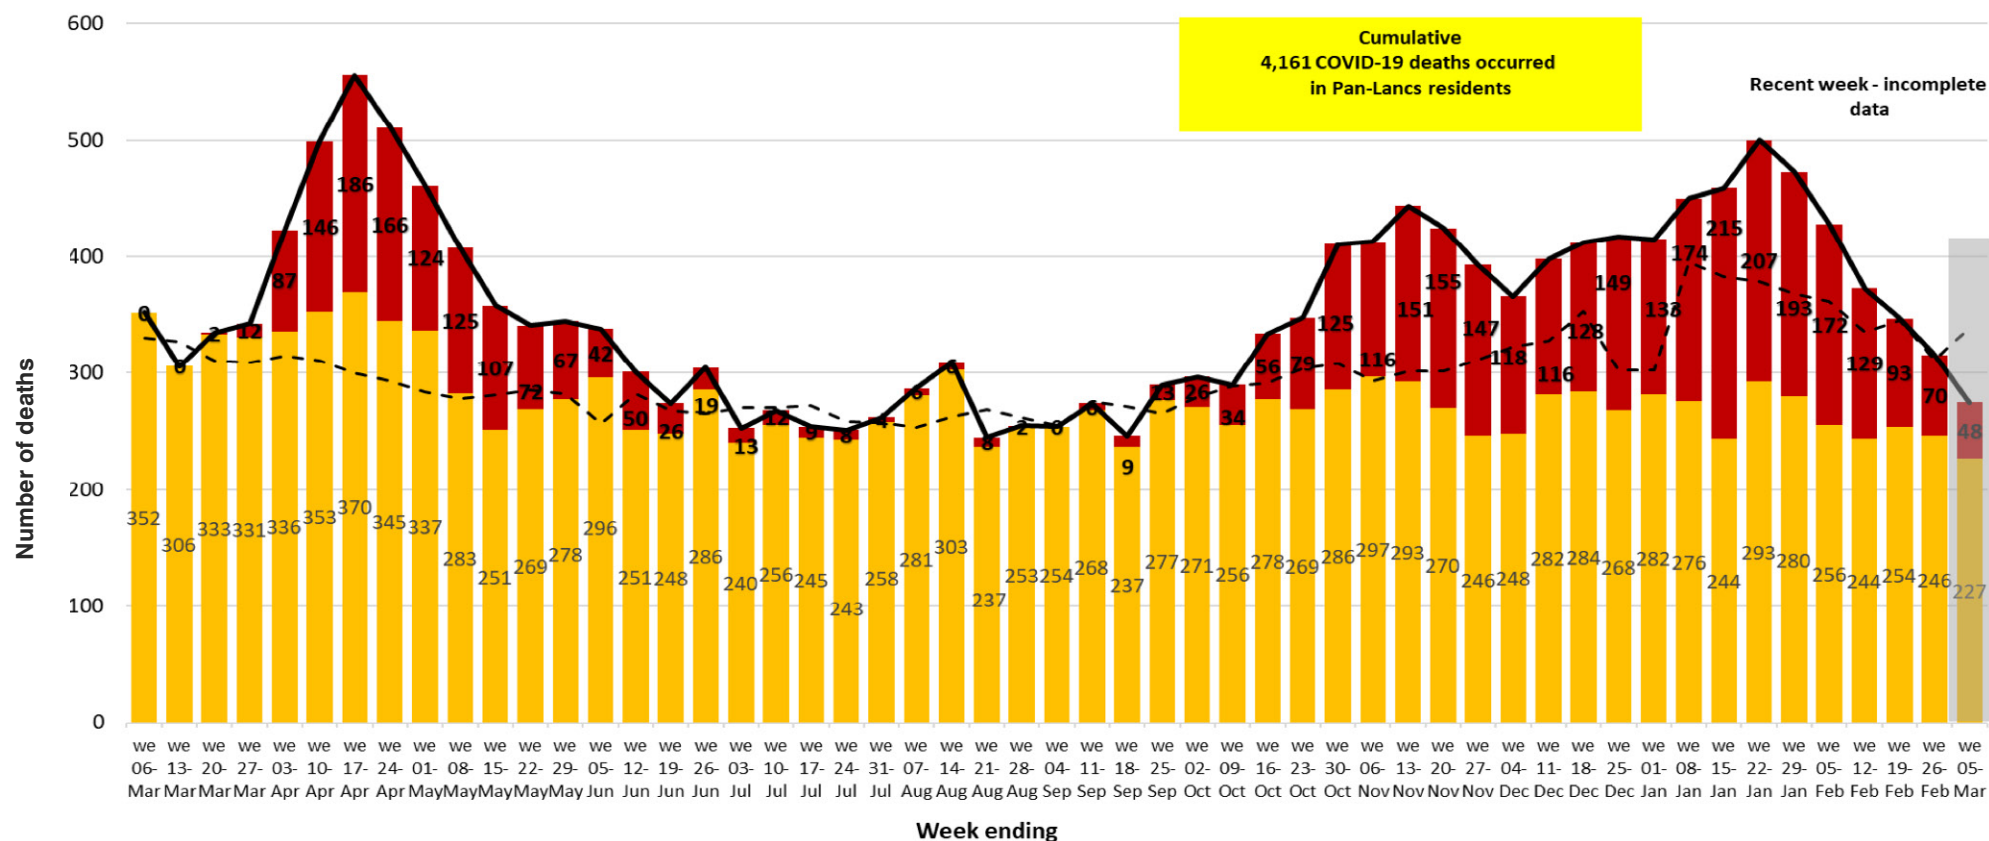

The weekly inpatient diagnoses are patients who received a confirmed COVID diagnosis after being admitted to hospital.

The in hospital data used is a subset of the data that is published monthly by the NHS here: <https://www.england.nhs.uk/statistics/statistical-work-areas/covid-19-hospital-activity/> It will not be made available at an organisation level.

Figures only include data for NHS Acute Trusts

# Deaths due to Covid-19\* - age standardised rate per 100,000 population, all persons - March 2020 to January 2021

Blackburn with Darwen and Blackpool's COVID-19 mortality rate is significantly worse than the England rate.  
The Lancashire County Council area's rate is also significantly worse than England.  
Along with the Lancashire County Council area, the individual authorities of Burnley, Pendle, Preston and Hyndburn are significantly higher than England.  
Only Lancaster and South Ribble's rates are significantly lower than the England rate.

### Population/cohort size (denominator) definitions

The estimates of population size can be used as a denominator to approximate or calculate vaccination coverage percentages. Two denominators are used:

1- Office for National Statistics (ONS) 2019 mid-year population estimates are provided as the official statistics and the best publicly available population estimates. These estimates are consistent with the UK COVID-19 vaccines deployment plan and therefore provide a reference point on progress. They are the most accurate estimates available at national level, however they are less robust at smaller areas and are subject to a degree of uncertainty as they are 2019 estimates based on the 2011 Census.

2- National Immunisation Management System (NIMS) denominators are provided for Lower Tier Local Authority (LTLA). NIMS denominators facilitate management of the vaccination programme at more granular levels and should be used when calculating vaccine coverage for public health purposes. NIMS denominators may provide an overcount if individuals are no longer resident in England, but may also be subject to some undercounting as they currently do not include individuals without an NHS number. Coverage can be viewed as being 'at least' the figures presented using the NIMS denominator.
