Weekly update for coronavirus figures in the county

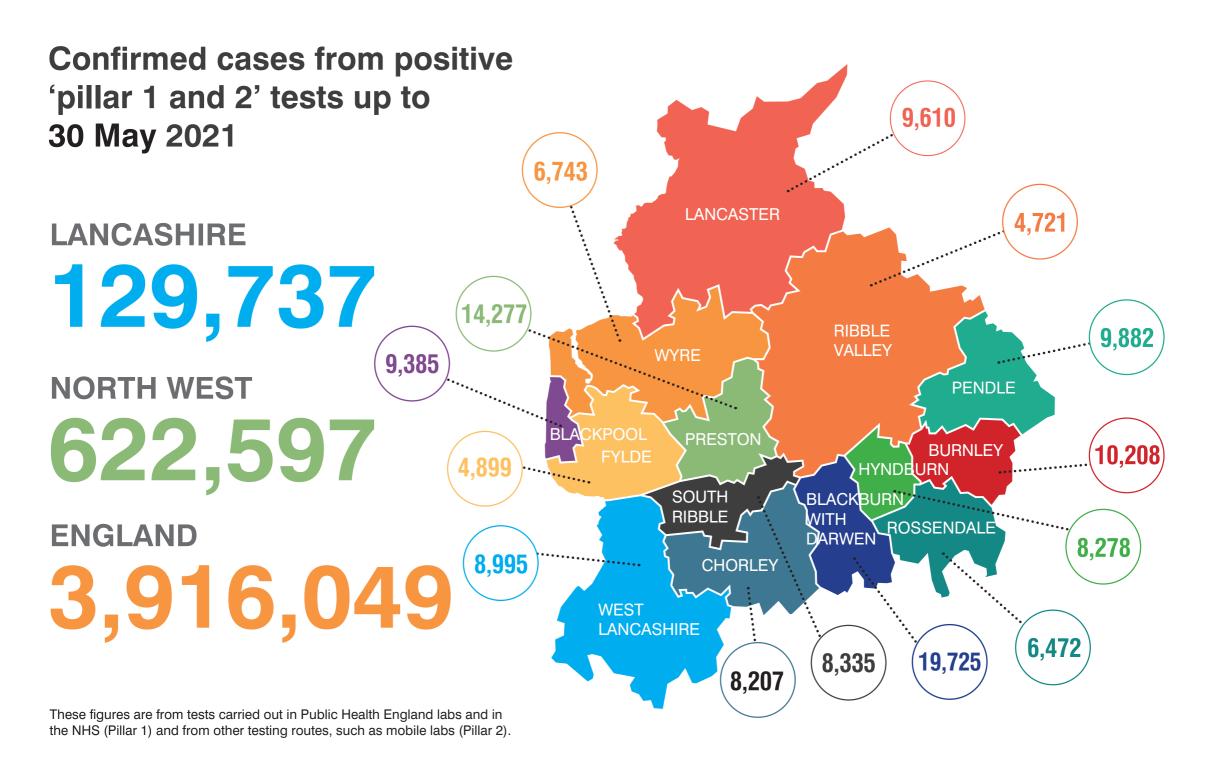

2 June 2021

How is coronavirus affecting people in Lancashire?

This is a weekly bulletin produced by the Lancashire Resilience Forum with the latest figures on the number of coronavirus-related cases and deaths in the county, as well as figures at a unitary and district level.

It also shows how Lancashire compares to other areas of the country.

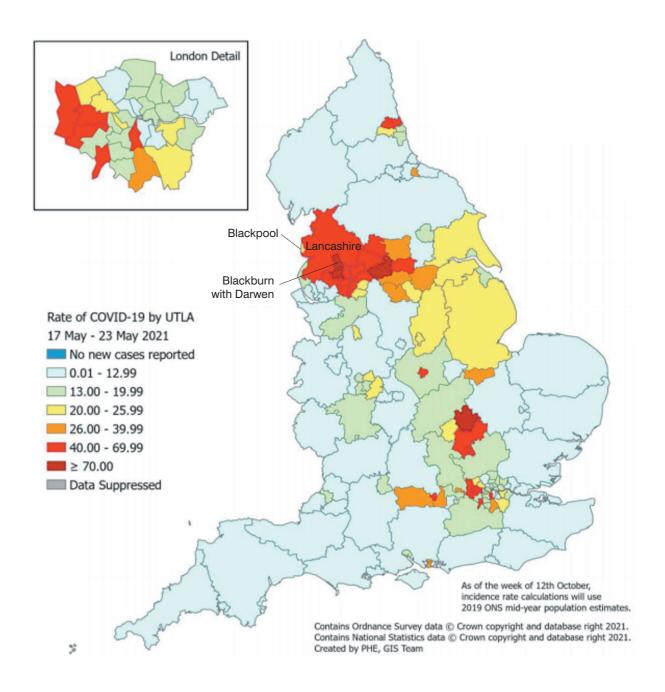

Weekly rate of Covid-19 cases per 100,000 population tested under pillar 1 and pillar 2 (Week 20 - data between 17 May and 23 May 2021).

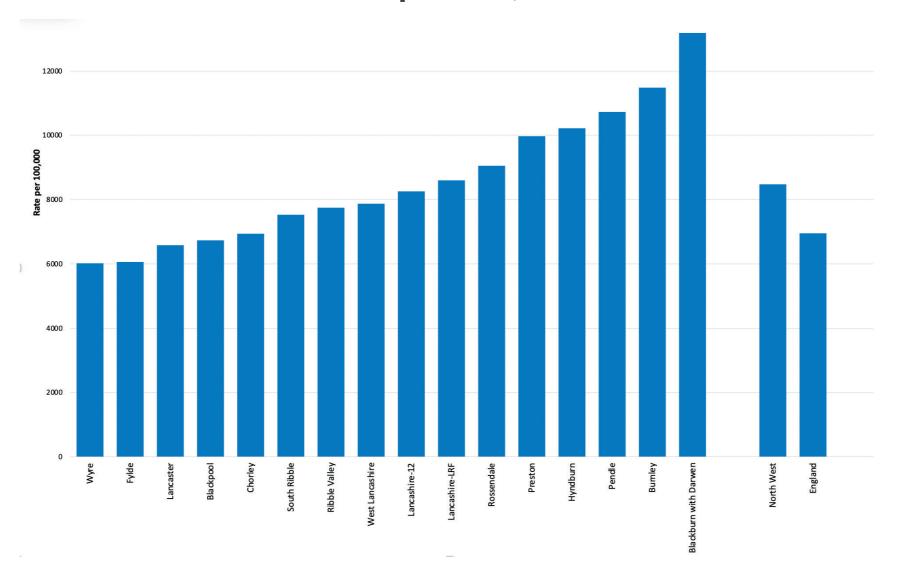

For rate of cases detected via Pillar 1 & 2 testing: Blackpool's rate is in the fourth highest band, Lancashire's rate is in the second highest band and Blackburn with Darwen's rate is in the highest band.

Pillar 1 = swab testing in PHE labs & NHS hospitals for those with a medical need and key workers & their families

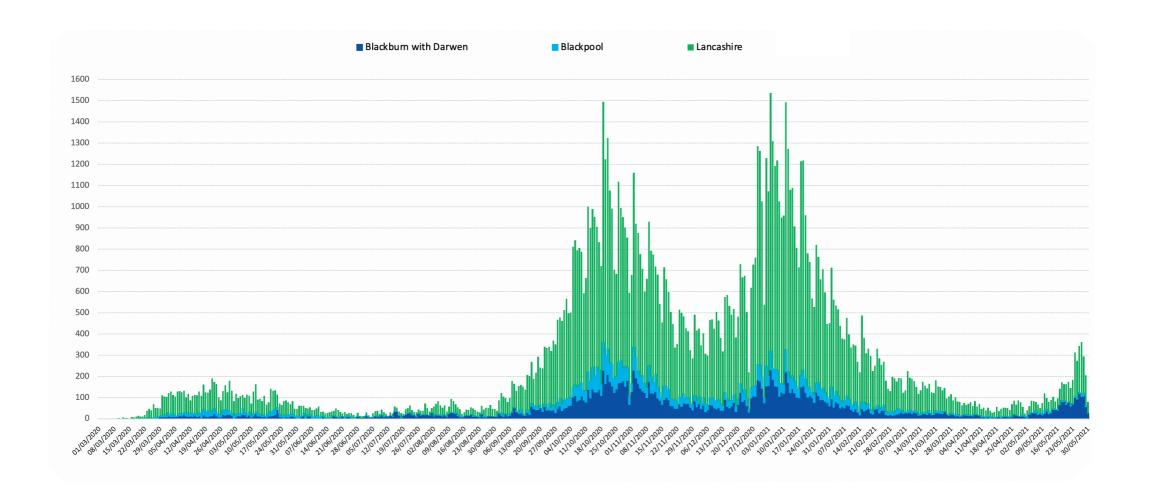

Pillar 2 = testing by commercial partners - swab testing for the wider population from out in the community

Cumulative lab-confirmed cases up to 30 May 2021, rate per 100,000

Daily pillar 1 and pillar 2 lab-confirmed cases to 30 May 2021

Positive tests are counted according to the date the sample was taken. However, most swabs taken in recent days will not yet have produced a result, so it is important not to jump to the conclusion that the epidemic is tailing off quicker than it really is. The PHE website cautions that only data from five days or more ago can be considered complete. The greyed-out columns in figure above are liable to be added to as more results come in.

Covid-19 cases (number of people with a lab-confirmed positive test result) by Middle Super Output Area (MSOA). MSOAs with 3 and above COVID-19 cases, in the 7 days ending 26 May

Local authority	MSOA name	New cases
Rossendale	Haslingden	74

Count of deaths identified as Covid-19 on death certificates and occurred up to 14 May but were registered up to 22 May 2021

LANCASHIRE

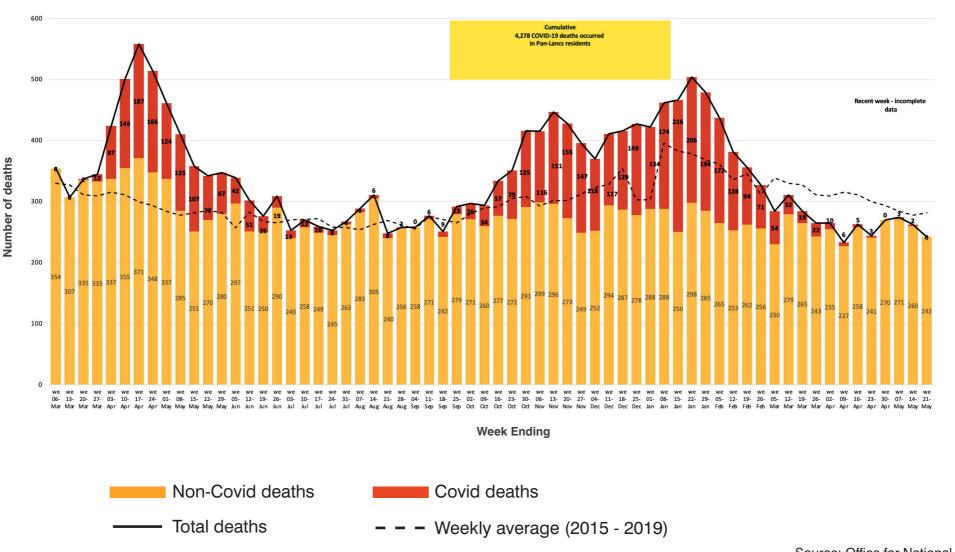

TOTAL 4,278

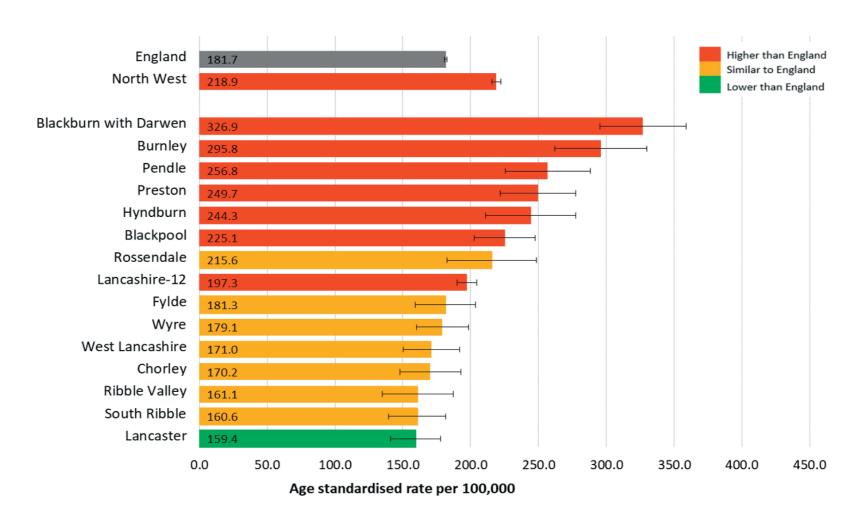

Up to the 22 May, the number of deaths where COVID-19 was mentioned on the death certificate: 4,278 registered in the Lancashire LRF area 3,342 registered in the Lancashire County Council area

Weekly deaths occurring up to 21 May, compared with the five-year weekly average

Deaths due to Covid-19* - age standardised rate per 100,000 population, all persons - March 2020 to April 2021

Blackburn with Darwen and Blackpool's COVID-19 mortality rate is significantly higher than the England rate.

The Lancashire County Council area's rate is also significantly higher than England.

Along with the Lancashire County Council area, the individual authorities of Burnley, Pendle, Preston and Hyndburn are significantly higher than England. Only Lancaster's rate is significantly lower than the England rate.

Standardised mortality rates are used to allow comparisons between populations that may contain different proportions of people of different ages.

Covid-19 Vaccinations by local authority of residence and age group 8 December 2020 to 16 May 2021

Number of people vaccinated with at least 1 dose

Area of residence	Under 40	40-44	45-49	50-54	55-59	60-64	65-69	70-74	75-79	80+
Blackburn with Darwen	12,370	6,421	7,441	8,925	8,377	7,439	6,278	5,880	3,900	5,179
Blackpool	14,783	5,882	7,250	9,568	10,183	8,787	7,268	7,542	5,624	7,516

Population/cohort size (denominator) definitions

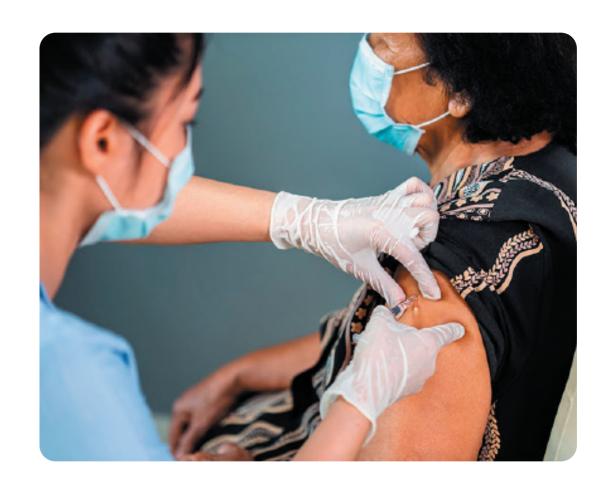

The estimates of population size can be used as a denominator to approximate or calculate vaccination coverage percentages. Two denominators are used::

- 1- Office for National Statistics (ONS) 2019 mid-year population estimates are provided as the official statistics and the best publicly available population estimates. These estimates are consistent with the UK COVID-19 vaccines deployment plan and therefore provide a reference point on progress. They are the most accurate estimates available at national level, however they are less robust at smaller areas and are subject to a degree of uncertainty as they are 2019 estimates based on the 2011 Census.
- 2- National Immunisation Management System (NIMS) denominators are provided for Lower Tier Local Authority (LTLA). NIMS denominators facilitate management of the vaccination programme at more granular levels and should be used when calculating vaccine coverage for public health purposes. NIMS denominators may provide an overcount if individuals are no longer resident in England, but may also be subject to some undercounting as they currently do not include individuals without an NHS number. Coverage can be viewed as being 'at least' the figures presented using the NIMS denominator. The NIMS denominators are based on the resident population and therefore people will be counted in the denominators if they live in England, even if their GP practice is in Wales or Scotland and they receive their vaccination outside of England. Therefore, when looking at lower levels of geography, areas near the borders may appear to have lower vaccine uptake rates than other areas of England.

Vaccine data

Find out more information about how many people have been vaccinated in your local area, as well as information about the progress of the vaccination programme at:

https://www.england.nhs.uk/ statistics/statistical-work-areas/ covid-19-vaccinations/

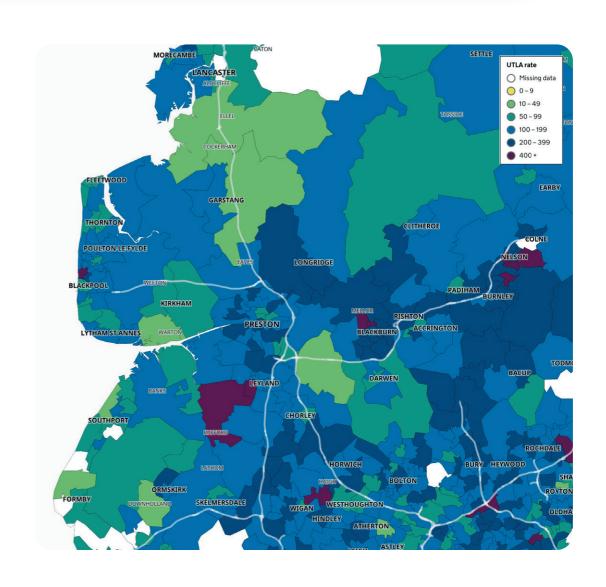

Local information

There is a wealth of local data is available from https://coronavirus.data.gov.uk

By typing in your postcode you will get a local dashboard which shows a range of information including how many positive cases and deaths there have been, and how your local area compares to the England average.

You can also explore the interactive map for England.

Help share our messages!

Access our <u>range of resources</u> to share on social media to encourage Lancashire people to play their part to combat coronavirus.

Find out more about the <u>LancsTogether</u> campaign and what you can do to take part.

We are all working together in Lancashire to combat coronavirus.
