

Weekly update for coronavirus figures in the county

21 July 2021

How is coronavirus affecting people in Lancashire?

This is a weekly bulletin produced by the Lancashire Resilience Forum with the latest figures on the number of coronavirus-related cases and deaths in the county, as well as figures at a unitary and district level.

It also shows how Lancashire compares to other areas of the country.

**Lancashire
Resilience
Forum**

Confirmed cases from positive 'pillar 1 and 2' tests up to 18 July 2021

LANCASHIRE

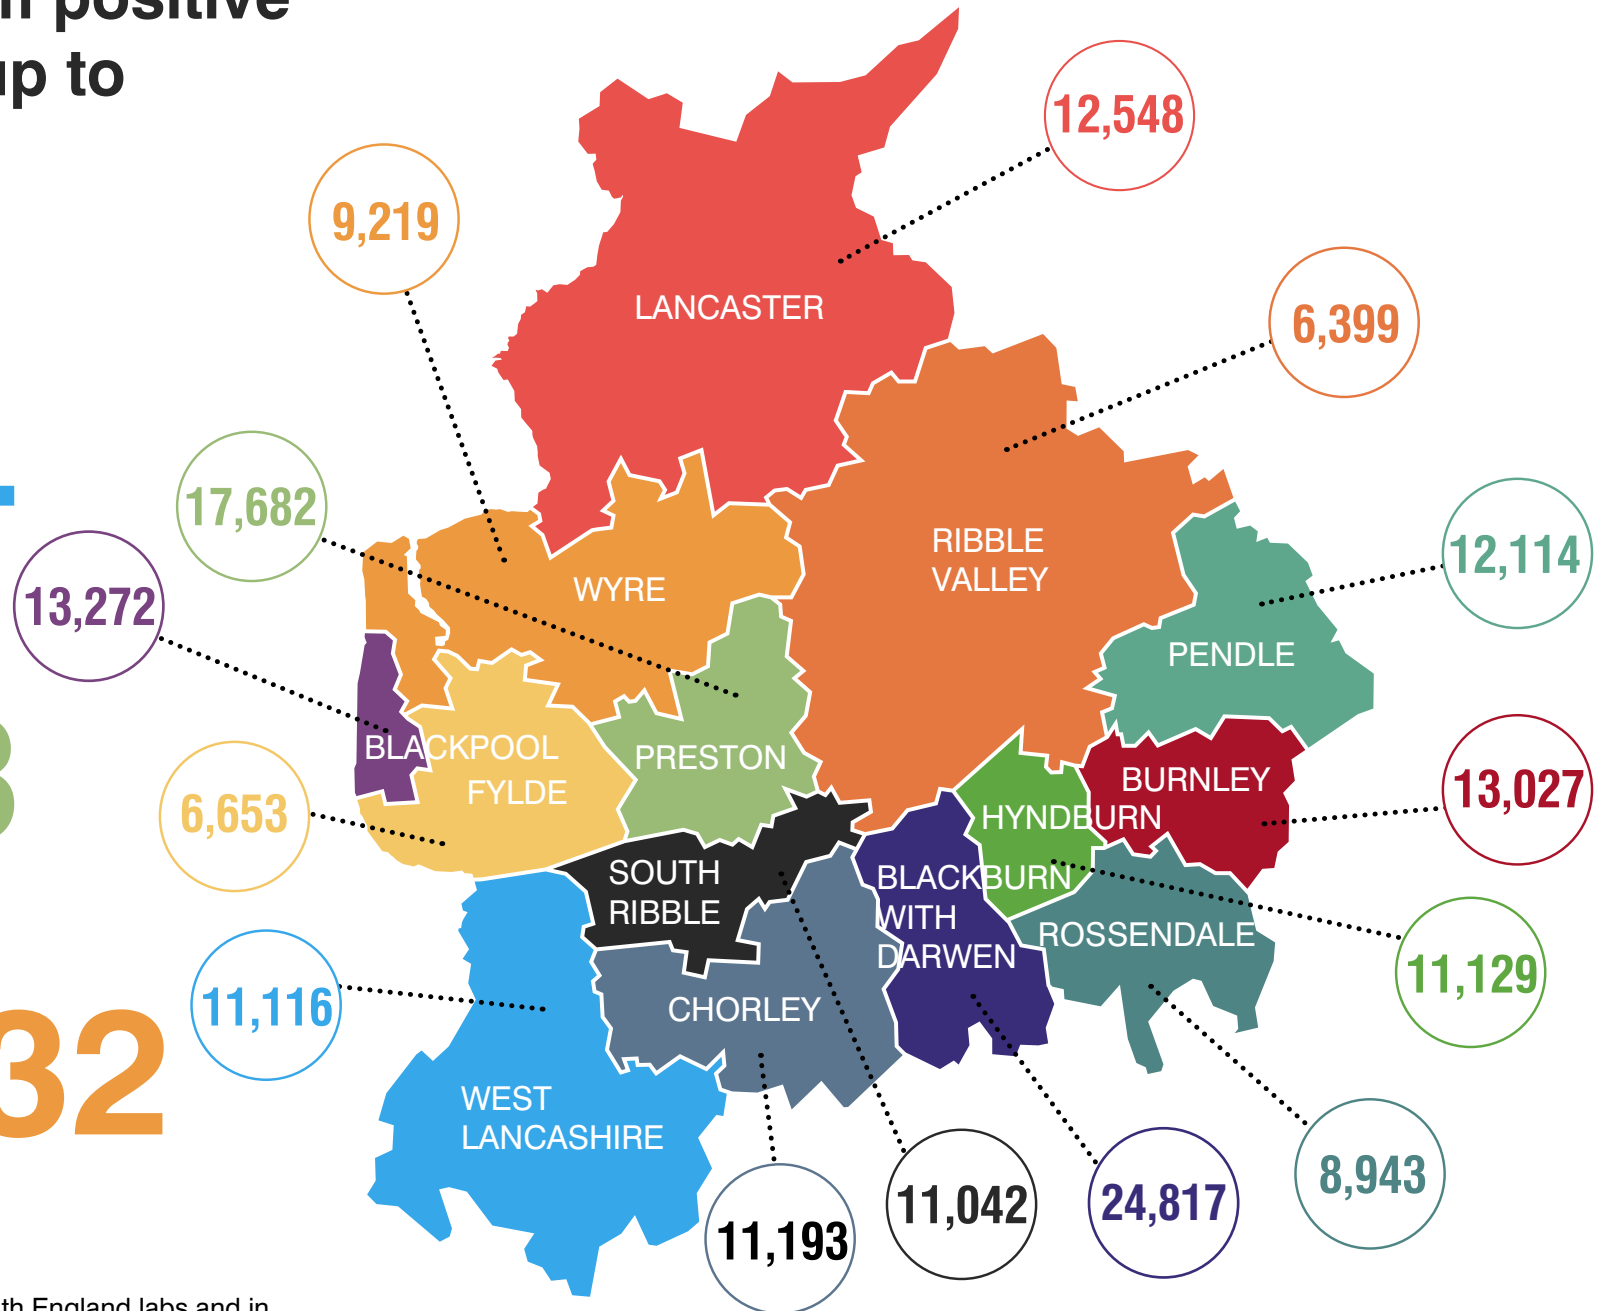

169,154

NORTH WEST

797,008

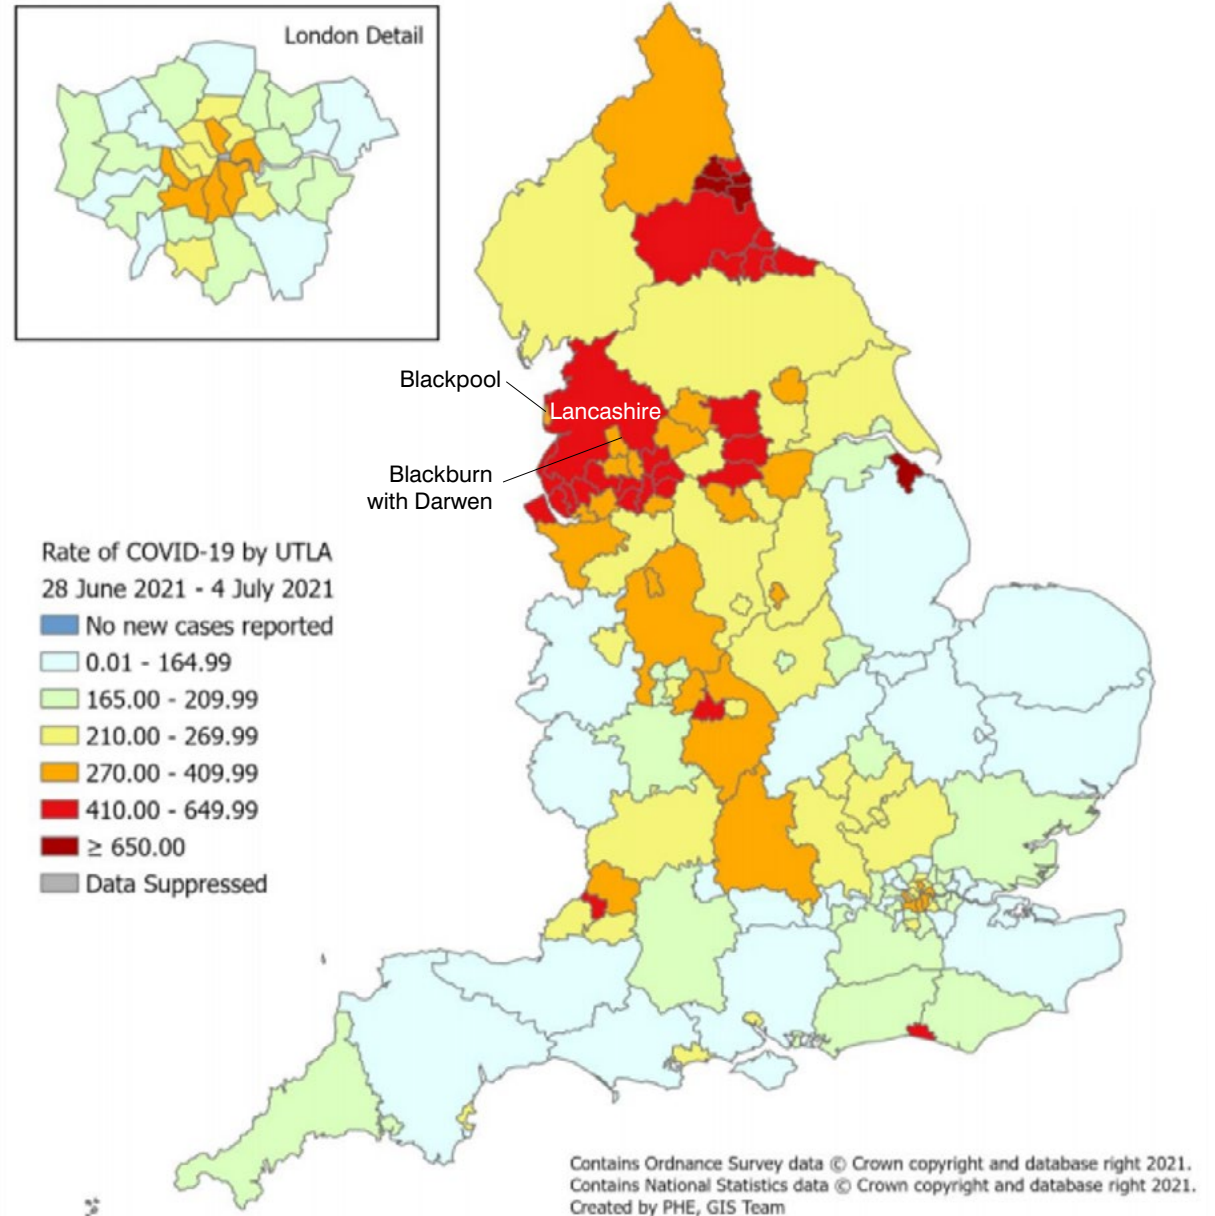

ENGLAND

4,769,632

These figures are from tests carried out in Public Health England labs and in the NHS (Pillar 1) and from other testing routes, such as mobile labs (Pillar 2).

Weekly rate of Covid-19 cases per 100,000 population tested under pillar 1 and pillar 2 (Week 26 - data between 28 June and 4 July 2021).

For rate of cases detected via Pillar 1 & 2 testing:
Blackpool and Blackburn with Darwen rates are in the third highest band, Lancashire rates are in the second highest band.

Pillar 1 = swab testing in PHE labs & NHS hospitals for those with a medical need and key workers & their families

Pillar 2 = testing by commercial partners - swab testing for the wider population from out in the community

Cumulative lab-confirmed cases up to 18 July 2021, rate per 100,000

Daily pillar 1 and pillar 2 lab-confirmed cases to 18 July 2021

Positive tests are counted according to the date the sample was taken. However, most swabs taken in recent days will not yet have produced a result, so it is important not to jump to the conclusion that the epidemic is tailing off quicker than it really is. The PHE website cautions that only data from five days or more ago can be considered complete. The greyed-out columns in figure above are liable to be added to as more results come in.

Figures relating to confirmed cases by Upper Tier Local Authority can be downloaded from: <https://coronavirus.data.gov.uk>

Testing and incidence

Specimens taken/outbreaks reported between 8 July - 14 July 2021

| Local Authority | Individuals Tested per 100,000 (7-Day Moving Average) | | | Percentage Tested Positive per 100,000 (7-Day Moving Average) | | | All Ages | | | | | 60+ Years | | | |

| North West | 625.3 | | | 11.8 | | | 515.6 | | | | | 129.8 | | | |
| England | 622.0 | | | 9.7 | | | 426.1 | | | | | 92.1 | | | |

Due to the reporting delays for comparison between Local Authorities the most recent 4 days are excluded from the calculations of rates and moving averages.

Single direction-of-travel arrows denote a percentage change of less than 10%.
Twin arrows denote a change of greater than 10%.

Count of deaths identified as Covid-19 on death certificates and occurred up to 9 July but were registered up to 17 July 2021

LANCASHIRE

TOTAL 4,358

Up to the 9 July, the number of deaths where COVID-19 was mentioned on the death certificate:
 4,358 registered in the Lancashire LRF area
 3,399 registered in the Lancashire County Council area

Source: Office for National Statistics (ONS)

Weekly deaths occurring up to 9 July, compared with the five-year weekly average

Non-Covid deaths
 Covid deaths

Total deaths
 Weekly average (2015 - 2019)

Deaths due to Covid-19* - age standardised rate per 100,000 population, all persons - March 2020 to April 2021

Blackburn with Darwen and Blackpool's COVID-19 mortality rate is significantly higher than the England rate.

The Lancashire County Council area's rate is also significantly higher than England.

Along with the Lancashire County Council area, the individual authorities of Burnley, Pendle, Preston and Hyndburn are significantly higher than England.

Only Lancaster's rate is significantly lower than the England rate.

Standardised mortality rates are used to allow comparisons between populations that may contain different proportions of people of different ages.

*Deaths registered where Covid-19 was the underlying (main) cause of death

Source: Office for National Statistics (ONS)

Covid-19 Vaccinations by local authority of residence and age group

8 December 2020 to 18 July 2021

Population/cohort size (denominator) definitions

The estimates of population size can be used as a denominator to approximate or calculate vaccination coverage percentages. Two denominators are used:

1- Office for National Statistics (ONS) 2019 mid-year population estimates are provided as the official statistics and the best publicly available population estimates. These estimates are consistent with the UK COVID-19 vaccines deployment plan and therefore provide a reference point on progress. They are the most accurate estimates available at national level, however they are less robust at smaller areas and are subject to a degree of uncertainty as they are 2019 estimates based on the 2011 Census.

2- National Immunisation Management System (NIMS) denominators are provided for Lower Tier Local Authority (LTLA). NIMS denominators facilitate management of the vaccination programme at more granular levels and should be used when calculating vaccine coverage for public health purposes. NIMS denominators may provide an overcount if individuals are no longer resident in England, but may also be subject to some undercounting as they currently do not include individuals without an NHS number. Coverage can be viewed as being 'at least' the figures presented using the NIMS denominator. The NIMS denominators are based on the resident population and therefore people will be counted in the denominators if they live in England, even if their GP practice is in Wales or Scotland and they receive their vaccination outside of England. Therefore, when looking at lower levels of geography, areas near the borders may appear to have lower vaccine uptake rates than other areas of England.

Number of COVID-19 cases occupying hospital beds in Lancashire and South Cumbria

| | 11/05/2021 | 18/05/2021 | 25/05/2021 | 01/06/2021 | 08/06/2021 | 15/06/2021 | 22/06/2021 | 29/06/2021 |
|---|------------|------------|------------|------------|------------|------------|------------|------------|
| Weekly admissions to hospitals for COVID-19 | 7 | 16 | 18 | 32 | 50 | 62 | 62 | 61 |
| Weekly inpatient diagnoses for COVID-19 | 12 | 23 | 25 | 18 | 27 | 54 | 69 | 57 |
| Number of HDU/ITU/IDU beds with COVID-19 patients on specified date | 4 | 10 | 16 | 31 | 36 | 68 | 42 | 59 |
| Number of beds (excluding HDU/ITU/IDU) with COVID-19 patients on specified date | 9 | 12 | 11 | 8 | 20 | 50 | 87 | 62 |

The hospital admission figures are of people who had a confirmed case of COVID-19 in the 14 days prior to admission.

The weekly inpatient diagnoses are patients who received a confirmed COVID diagnosis after being admitted to hospital.

The in hospital data used is a subset of the data that is published monthly by the NHS here: <https://www.england.nhs.uk/statistics/statistical-work-areas/covid-19-hospital-activity/> It will not be made available at an organisation level.

Figures only include data for NHS Acute Trusts

Missing submissions to the COVID-19 SitRep: East Lancashire (10-Nov), Lancashire & South Cumbria (25-Dec and 14-May)

Vaccine data

Find out more information about how many people have been vaccinated in your local area, as well as information about the progress of the vaccination programme at:

<https://www.england.nhs.uk/statistics/statistical-work-areas/covid-19-vaccinations/>

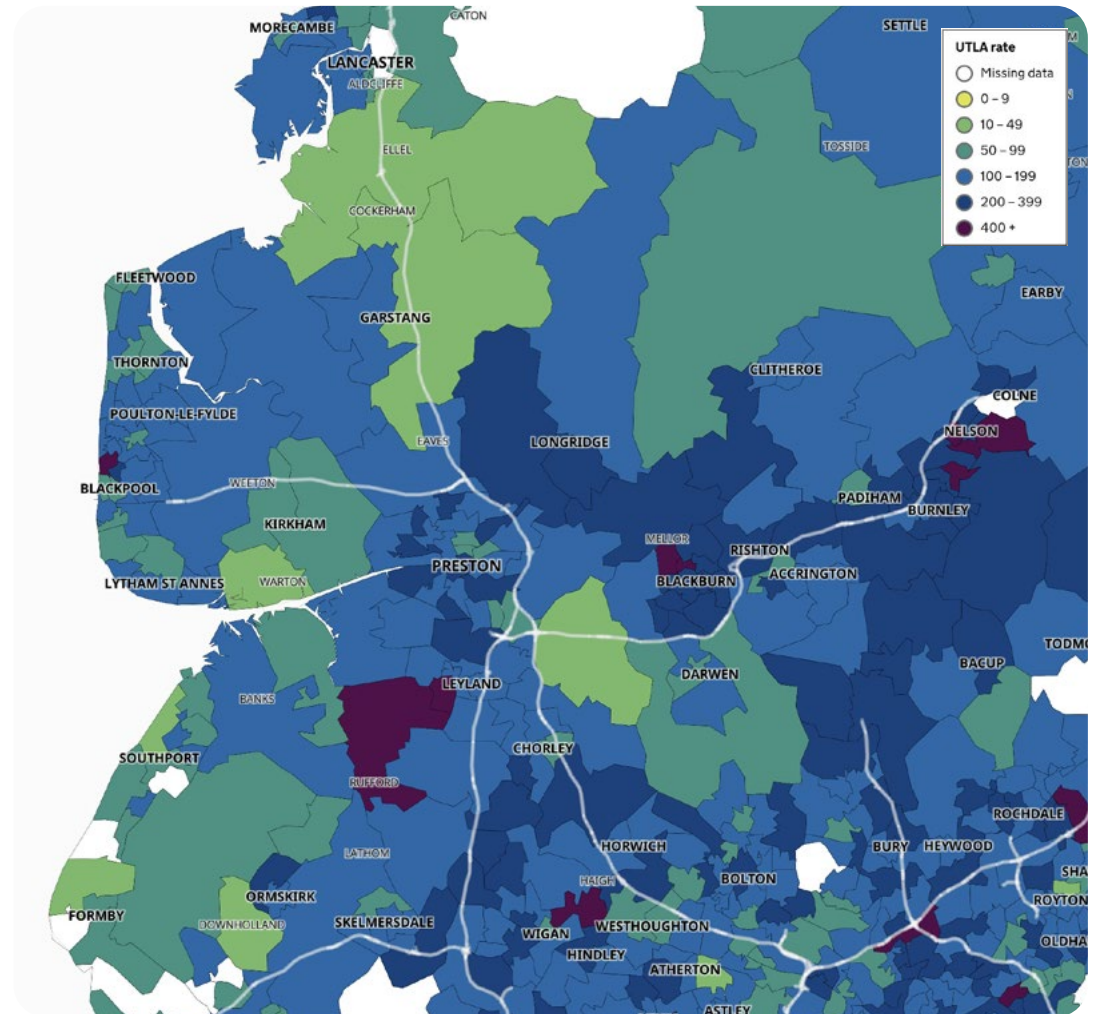

Local information

There is a wealth of local data is available from <https://coronavirus.data.gov.uk>

By typing in your postcode you will get a local dashboard which shows a range of information including how many positive cases and deaths there have been, and how your local area compares to the England average.

You can also explore the interactive map for England.
