

STATEMENT OF REASONS

Lancaster

(North and South Car Parks, Lancaster Park & Ride)

"The County council is contractually bound to provide a number of bays complete with the necessary electric equipment to allow drivers to charge electrically powered vehicles.

The purpose of this traffic regulation order is to ensure that the bays are available and used for drivers to charge their vehicles and to ensure once the charging is complete the bays are vacated to allow others to use the same facilities.

Whilst completing the necessary works for the electric vehicle charging bays it has been decided to include factors in the off-street car park order to ensure that the allocated bays for vulnerable road users (disabled bays) are available for their allocated use and that the movement around the site is correctly regulated and free of obstruction."
