

Uncle Simon is a Car Mechanic

My uncle Simon is a car mechanic and he works in his *garage* six days a week.

I am a car mechanic *apprentice* and help my uncle on Mondays, Tuesdays and Fridays. For the rest of the week I am studying in *college*.

Yesterday, uncle Simon and I were repairing a few parts in a grey Vauxhall Corsa car.

There were some *scratches* on the bonnet and the boot

The exhaust and one of the wipers were missing.

The back right tyre was flat and two front mirrors were broken.

The work at my uncle's garage is very hard but I cannot imagine myself doing something else. I have always been interested in cars and this is what I want to do in the future.

Vocabulary:

apprentice - a person who is learning a trade by working in that job.

garage - a building in which you keep a car or you can get your car repaired.

college - a school for higher education

scratches - small shallow cuts

Answer the questions below.

1. What is uncle Simon's job?

2. How many days in a week does uncle Simon work?

3. Does uncle Simon's nephew work for him on Thursdays?

4. What car were uncle Simon and his nephew fixing yesterday?

5. Were the mirrors or wipers missing on the car?

6. Was the bonnet scratched?

7. What was wrong with the back right tyre?
