

Helicopters and Jet Planes

Jasper and Jonathan are brothers. Jasper is thirteen, and Jonathan is two years younger.

Both brothers are interested in making models of different kind of planes.

Jasper prefers building helicopters. He has already made fifteen and in his

room there are: some military helicopters like a Chinook

and an Apache.

He also has an air ambulance,

and a police helicopter.

Jonathan likes making jet planes. At the moment, he is building a beautiful

American "Blue Angel".

The boys love getting model plane kits for Christmas or as birthday presents. They also use some of their pocket money to buy them.

Jonathan and Jasper compete to see who has the most model planes on their shelves. At the moment Jonathan is the winner, because he has built three more planes than his elder brother.

Decide whether the sentences below are true (T) or false (F).

1. Jonathan is fifteen.
2. The boys' hobby is building military model ships.
3. Jasper collects helicopters.
4. In Jasper's room you can find models of a Chinook and Apache.
5. Jonathan is making an American "Blue Eagle" jet.
6. The boys get plane model kits for Christmas and Easter.
7. They can buy model kits, because they get pocket money.
8. Jonathan has built eighteen plane models.
