Provider Assessment and Market Management Solution (PAMMS): Provider Information

In strictest confidence

Purpose

To provide an initial update to the providers across the organisations involved for the purposes of information sharing

Headline Updates

- Adam system will be replaced with a new provider returns system called PAMMS
- Implementation will be in the late Spring

When will the change happen?

- Currently looking to start using the new system for provider returns in early May
- Further, more detailed update to be provided in late March

How will this be implemented?

- Registration data will be taken automatically from CQC data so you will not need to register your organisation onto the new system
- You will receive an email once this has happened to let you know you are set up and to invite you to create an account on the new system
- Training will be run jointly between the Council and PAMMS which you will be invited to attend

What differences will I notice in the new system?

- This should be fairly minimal – the new system is straightforward to use and the questions on the return will be similar to the ones you are currently used to answering
- The frequency of returns will be the same as with the current system
- There is no Red, Amber Green scoring. This is being explored and may be introduced later in the implementation period.
