

Walk and talk while on a dog walk

Talk to your child about the things a dog might be thinking while on the walk, what can he here, see, smell and feel through his paws?

Does he run through the muddy puddles or have a little drink from a stream? Can he feel the leaves and grass brushing against him as he runs through the long grass?

What can you see, hear, smell and touch?

Talk about the huge old trees and any new ones that have been planted and are growing, what about the stinging nettles and beautiful red berries on the trees that the birds love to eat.

Can you spot any new trees, nettles or berries on your walk?
