

## **Lodge Lane Wennington**

### **Statement of Reasons**

The purpose of the 30mph speed limit is to improve the safety for all highway users and increase the sustainability for the development. Reducing the length of the de-restricted restriction would provide protection and more time for vehicles to navigate the new junction.

This proposal also revokes part of a restricted road Speed Limit Order which is no longer required due to the presence of a system of street lighting.

These proposals are being funded by the developer of the site under Section 278 of the Highways Act 1980
