

Preston Western Distributor Road

Statement of Reasons

The purpose of this proposal is to correct the names of the newly constructed roads from their temporary moniker, as well as to correct a few minor errors relating to the measurements of the various speed limits within this order.

This proposal also reduces the speed limit on Lea Lane (U4584) from 40mph to 30mph. The construction of the new Preston Western Distributor Road has now cut off this section of road and a 40mph speed limit is no longer considered a safe or appropriate limit, given the new nature of this road.
