THE NATIONAL GRID

TO GIVE A GRID REFERENCE CORRECT TO 100 METRES

EXAMPLE

The Grid Letters on this sheet are SD

EAST

Take west edge of kilometre square in which point lies and read the large figures printed opposite this line on north or south margin.

Estimate tenths Eastwards

33

Take south edge of kilometre square in which point lies and read the large figures printed opposite this line on east or west margin.

Estimate tenths Southwards

44

Full 100 Metres Reference SD 330407

The above Full Reference is unique. For many purposes the first grid letter can be omitted, giving a reference, SD 330407 which recurs at intervals of 500 Kilometres. If both grid letters are omitted, the resulting reference 330407 recurs at intervals of 100 Kilometres. When the area concerned is sufficiently restricted, as will usually be the case with maps on scales of one inch to the mile and larger, both the grid letters are normally omitted.
