

Walmsley Bridge Lane Land Slip

Statement of Reasons

Following Storm Ciara in 2020, approximately 25m length of Walmsley Bridge Lane adjacent to the River Brock in Claughton on Brock slipped. Walmsley Bridge Lane became unsafe for motor vehicles to pass and has since been closed to traffic. The purpose of this proposal is to close a section of Walmsley Bridge Lane to all motorised vehicles therefore only open to cyclists, equestrians and pedestrians.

These proposals include the following:

- A prohibition of driving traffic regulation order for a section of Walmsley Bridge Lane at the land slip location
- Road traffic signage providing advanced warning of the prohibition of driving
- Timber post and rail fencing installed adjacent to the landslip location
- This prohibition includes an obstruction in accordance with Section 92 of the Road Traffic Regulation Act 1984 by introducing bollards to prevent vehicular traffic entering the section of Walmsley Bridge Lane exposed to the land slip

We are satisfied that article 3(1) of the RTRA does not apply as we consider the proposal falls under sections (a) and (b) from Article 3(2) of the RTRA applies

With these restrictions in place, risk to public safety will be reduced.

REASONS UNDER Section 1 of the RTRA

- (a) for avoiding danger to persons or other traffic using the road or any other road or for preventing the likelihood of any such danger arising, or
- (c) for preventing the use of the road by vehicular traffic of a kind which, or its use by vehicular traffic in a manner which, is unsuitable having regard to the existing character of the road or adjoining property, or
