

Health and safety at the site questionnaire

The Inspector will visit the site and will need to know what safety equipment and protective clothing to bring. The following questions indicate the type of information the Inspector will need about the site and any land or building that the Inspector will need to enter. Please supply any additional information on a separate sheet of paper.

1. Is the site uneven or does it present any other known risks? Is special footwear or any other Personal Protection Equipment required, and will this be supplied at the site?

It is not possible to walk the full length of the Order route but it can be viewed from an existing public footpath that crosses a field and runs adjacent to part of the route. Walking boots or wellington boots are recommended.

2. Is there any likelihood of exposure to pets or other animals which may present a risk to the safety of the Inspector?

Cows or sheep may be grazing in the field crossed by the Order route.

3. Is the site remote and/or can it be seen from other occupied buildings/property/public land/roadside?

The site is in a rural location but there are properties at either end.

4. Does the site have a good mobile phone signal or is there easy access to a public telephone should the emergency services be required?

There is a good mobile signal.

5. Are there any areas that require specialist equipment or training for access – any confined spaces?

None identified.

6. Are there any dangerous pieces of equipment or substances stored at the location?

None identified.

7. Is there any likelihood of exposure to chemicals, asbestos, radiation or are there any other risks, requiring the use of Personal Protection Equipment, which may affect the health & safety of the Inspector? (Asbestos is referred to directly as it was present in buildings built before it was banned in 1977).

None identified.

8. If there is any other relevant information which the Inspector should be aware of that is not covered in this questionnaire?

The Inspector's attention is drawn to the PowerPoint photographs showing the route which are included in the submission bundle and the description of the route included in the Regulatory Committee report.

The route is blocked at points A, B and D.
