The Altitudes of Bench Marks and surface heights are given in Feet above the mean level of the sea at NEWLYN, and are based on the new primary levelling of 1912-21. The contours, however, are referred to the old Liverpool Datum and not based on the new primary levelling. This may produce discrepancies between the contours and the bench marks and spot levels apart from change due to possible surface movement between date of contouring and relevelling.

To refer heights to the obsolete Liverpool Datum, add to the figures shown 0·2 feet. Note that the correction applies to this plan only and is only approximate to 0·1 ft. Further information on application.

Altitudes indicated thus (BM. ✦ 54·17) refer to bench marks on buildings, walls, &c., those marked (·), preceded or followed by the height, to surface levels.

If this margin is removed for mounting paste this diagram on back.
